The Peter Prescription How To Make Things Go Right:

THE PETER PRESCRIPTION HOW TO MAKE THINGS GO RIGHT DR. LAURENCE J. PETER, 1972 **Ethics Protocols and Research Ethics Committees** D. Remenyi, Nicola Swan, Ben Van Den Assem, 2011

Conducting research to high ethical standards is of great importance to the student and the university. Having an Ethics Protocol is the way of ensuring such standards can be met. Researching with the use of an approved Ethics Protocol also affords protection to the student. Many research degree candidates need advice to help complete an application for the approval of their Ethics Protocol. This book shows how to do this in a practical and effective way. The book provides background on the issue of research ethics to help students and faculty have a greater understanding of the motivations behind the requirements to write an application to the Ethics Committee for the approval of an Ethics Protocol. The process of ethics approval and the function of the Ethics Committee are addressed along with how to cope with amendments to an Ethics Protocol. The book draws on the work of the authors who have had direct experience with Ethics Committees and helping students comply with the requirements.

Back cover *The Measure of a Leader* Robert I. Mann, 2013-03-26

What makes a great leader? Personality? A response to the demands of time and circumstance? Where is leadership located in modern organizations? Has it a place in the management of corporate enterprise? What contributes to a leader's control? These and many other questions are explored in the theoretical background of this work. An examination of twentieth-century theories about the sources of personal powers, the social forces that enabled it, the psychological roots of leader relationships, the ingredients of leader style and quality, and the conduct identified as a leader's behaviors is directed at identifying the measurable elements of this social phenomenon. Three chapters document experimental attempts to analyse leader performance, recognizing form, style and quality in quantifiable detail. The use of descriptive questionnaires as means of labeling leader performance and quantifying its characteristics provides definitive insights into the nature of this social phenomenon. Finally, a unique system for leader appraisal, the Leader Appraisal Questionnaire (LAQ), based upon sound theoretical principles and twenty years of experimental research with the questionnaire methodology, is detailed. This novel system, adaptable to all kinds of organizations and enterprises, provides a unique tool for leadership evaluation and development. Given that leadership is a primary consideration in all kinds of organizational pursuits, this book is a must for every major institutional and corporate executive office, every government administration, institutions of higher learning and research, and any person who wishes to undertake and make success of a group enterprise.

Doing Research in Business and Management Dan Remenyi, D. Remenyi, 1998-09-14

Doing Research in Business and Management has been written to help students obtain a thorough understanding of the main methodological issues and options that are available to them as business and management researchers undertaking a masters or doctoral degree. Doing Research in Business and Management takes the reader through all of the important issues that need to be understood if a competent piece of research is to be produced at the masters or doctoral level in the business

and management studies The authors explain the interrelationship between the theoretical and empirical research as well as the differences between positivism and phenomenology Not only do they put these concepts in context for the business and management student but they go on to discuss how these different approaches are used in practice Furthermore the authors discuss the implications of quantitative and qualitative approaches to research The book offers high level advice on different numerical techniques available to researchers as well as different software packages that may be used for analyzing qualitative data The book also discusses the use of the Internet to support research in masters and doctoral programs

The Foreign Service Personnel System Patrick E. Linehan, 2019-08-16 First published in 1976 This study is perhaps the most comprehensive objective and accurate analysis to date of the State Department's Foreign Service personnel system Largely based on in depth interviews of 330 Foreign Service officers ranging in rank from career minister to newly appointed officer and extensively documented the book examines the needs of the Foreign Service organization and its personnel and presents an analysis of the policies and procedures according to which it operates Areas covered include recruitment training assignments performance evaluation promotions and attrition Also discussed in detail is the structure and functioning of the informal system of rules and regulations developed by Foreign Service officers individuals use this system which is outside of the prescribed channels in attempting to influence their career development Despite its specialized orientation the study utilizes a methodology that can be applied to any large organization Carlos Slim Diego Osorno, 2019-09-24 The biography of Carlos Slim one of the richest people of all time is not just the tale of the first man from a developing country to ever reach the top of the Forbes list of billionaires It is the story of a character who represents the neoliberal mentality of our times who mistrusts politicians believes that the market is the most efficient mechanism for everything even to combat corruption and sees philanthropy as a social investment with businesses as the exclusive form of collective wealth In this new book produced through years of thorough investigation Osorno examines this symbol of twenty first century capitalism and of Mexico Similar surreal dimensions lead Osorno to openly ask whether a man as rich as him can also be a good person

ADMINISTRATIVE THEORIES AND MANAGEMENT THOUGHT R. K. SAPRU, 2013-03-11 The Third Edition of this well received text encompasses the manifold administrative theories and management thought propounded and enunciated by administrative and management thinkers over the past several decades The text incorporates major additions and revisions to make it more up to date comprehensive and reader friendly What's New To This Edition Addition of five new chapters to enlarge the scope of the book A revised chapter on Public Choice Theory The text not only gives a complete and up to date analysis of administrative theories but also introduces the reader to new concepts approaches and techniques in public administration Undergraduate and postgraduate students of public administration and postgraduate students of political science and management should find this fully revised text to be of immense value **African Perspectives in American Higher Education** Festus E. Obiakor, Jacob U. Gordon, 2003 African Perspectives in American Higher Education

Invisible Voices Creating Value in the Digital Era Alf Chattell, 2016-07-27 We live in a time of exciting possibilities The business world is being transformed as digital technologies shift the basis of competition from machine intensity to human intensity The foundations of success in today's fast moving global economy are the creative capacities of people competitive advantage is now based on insight imagination and innovation But meeting the challenges of value creation in this digital era requires a revolution in thought outlook and practice New models of business are needed to provide fresh perspectives on creating and sustaining value in an economy founded on human talent This practical guide explains how to revolutionise your management strategies create value for your customers and grasp the new opportunities offered by the digital era **The Effective Corrections Manager** Richard L. Phillips, Charles R. McConnell, 1996
