The Peters World Atlas:

The Peters World Atlas Arno Peters, 2002 Finally correcting many long standing misconceptions about the geography of our own planet the Peters World Atlas presents one sixtieth of the Earth's surface as an astronaut's eye view on each double page spread Its unique use of colour and relief is intuitive so jungles are green deserts are brown and mountains appear to bulge out of the page In addition to this 246 thematic maps explore such topics as nature society global rainfall birth control marriage weather status of women employment and military strength among others In full colour **Third**

World Atlas Alan Thomas, Ben Crow, 2020-07-26 This book focuses on some of the Third World's common experiences such as its historical linkages with the West the challenge to provide basic needs and the effects of competition in the global economy It will be useful in bringing a spatial and statistical dimension to the study of development The World Atlas of

Trees and Forests Herman Shugart, Peter White, Sassan Saatchi, Jérôme Chave, 2022-09-20 A marvelously illustrated look at the world's diverse forests and their ecosystems The earth's forests are havens of nature supporting a diversity of life Shaped by climate and geography these vast and dynamic wooded spaces offer unique ecosystems that shelter complex and interdependent webs of flora fungi and animals The World Atlas of Trees and Forests offers a beautiful introduction to what forests are how they work how they grow and how we map assess and conserve them Provides the most wide ranging coverage of the world's forests available Takes readers beneath the breathtaking variety of wooded canopies that span the globe Profiles a wealth of tree species with enlightening and entertaining natural history highlights along the way Features stunning color photos maps and graphics Draws on the latest cutting edge research and technology including satellite imagery

The State of the World Atlas Dan Smith, 2013-10-31 Over 50 full colour world maps and graphics break down hardcore statistics to provide a compelling analysis of all the political social economic and ecological nightmares that keep us awake at night The world's car population has grown five times as fast as the human population over the last 50 years Wal Mart's sales revenue exceeds the GDP of 150 countries Climate change may put 2.7 billion at risk of armed conflict Germany generates more tourists than anywhere else Americans use 160 times more water than people in Rwanda If you want to get behind the headlines and understand the world from urbanization to globalization terrorism to tourism military spending to human rights The State of the World Atlas is unmatched *Folens World Atlas* Patricia Harrison, Steve Harrison, 1993-06

World Atlas of Epidemic Diseases Smallman-Raynor Matthew, Haggett Peter, Cliff Andrew, 2004-04-30 The euphoria about the defeat of epidemics which surrounded the global eradication of smallpox in the 1970s proved short lived The advent of AIDS in the following decade the widening spectrum of other newly emergent diseases from Ebola to Hanta virus and the resurgence of old diseases such as tuberculosis and malaria all suggest that the threat

The Penguin State of the World Atlas Dan Smith, 2008 Now in its eighth edition the widely praised Penguin State of the World Atlas remains a unique visual survey of current events and global trends Completely revised and updated this atlas presents the latest statistics on

communications and information technology international trade globalization of work aging and new health risks food and water energy resources and consumption global warming and biodiversity literacy gender equality wars and peacekeeping and more Fascinating troubling and surprising this is one atlas no student of the world should be without Peters World Atlas Peters Arno,2010-08-10 Provides physical political and human and economic geography maps of the world in current surface area proportion and includes maps covering such subjects as nutrition demography energy use and health

Rhumb Lines and Map Wars Mark Monmonier,2010-11-15 In Rhumb Lines and Map Wars Mark Monmonier offers an insightful richly illustrated account of the controversies surrounding Flemish cartographer Gerard Mercator's legacy He takes us back to 1569 when Mercator announced a clever method of portraying the earth on a flat surface creating the first projection to take into account the earth's roundness As Monmonier shows mariners benefited most from Mercator's projection which allowed for easy navigation of the high seas with rhumb lines clear cut routes with a constant compass bearing for true direction But the projection's popularity among nineteenth century sailors led to its overuse often in inappropriate non navigational ways for wall maps world atlases and geopolitical propaganda Because it distorts the proportionate size of countries the Mercator map was criticized for inflating Europe and North America in a promotion of colonialism In 1974 German historian Arno Peters proffered his own map on which countries were ostensibly drawn in true proportion to one another In the ensuing map wars of the 1970s and 1980s these dueling projections vied for public support with varying degrees of success Widely acclaimed for his accessible intelligent books on maps and mapping Monmonier here examines the uses and limitations of one of cartography's most significant innovations With informed skepticism he offers insightful interpretations of why well intentioned clerics and development advocates rallied around the Peters projection which flagrantly distorted the shape of Third World nations why journalists covering the controversy ignored alternative world maps and other key issues and how a few postmodern writers defended the Peters worldview with a self serving overstatement of the power of maps Rhumb Lines and Map Wars is vintage Monmonier historically rich beautifully written and fully engaged with the issues of our time *Maps and Politics* Jeremy Black,2000-09-01 We all rely on the apparent accuracy and objectivity of maps but often do not see the very process of mapping as political Are the power and purpose of maps inherently political Maps and Politics addresses this important question and seeks to emphasize that the apparent objectivity of the map making and map using process cannot be divorced from aspects of the politics of representation Maps have played and continue to play a major role in both international and domestic politics They show how visual geographical representations can be made to reflect and advance political agendas in powerful ways The major developments in this field over the last century are responses both to cartographic progression and to a greater emphasis on graphic imagery in societies affected by politicization democratization and consumer and cultural shifts Jeremy Black asks whether bias free cartography is possible and demonstrates that maps are not straightforward visual texts but contain political and politicizing
