Nicolas Joly, 2001-05-01 *Toward a Phenomenology of the Etheric World* Jochen Bockemühl, 1985 For more than three centuries scientists have studied the world as detached observers In doing so science has achieved marvelous results but it has also lost the sense of the whole that earlier cultures possessed By concentrating on the text of the physical world science has lost the context the etheric world of life forces Goethean phenomenology so named for Goethe's observations is a scientific method capable of bringing the clarity of natural science to this context of phenomena Unconsciously scientific observers have always been using the context to read the text The phenomenological method involves training observers to look at the activity of thinking itself as it perceives intentionally It then uses this activity itself as a means of perception The observer thus becomes conscious that physical nature is indeed a text and that its meaning derives from the etheric context Unlike the more common hypothetical and deductive methods which presuppose a detached observer the phenomenological method is based on active participation by the observer This eliminates the need to construct speculative hypotheses the observer's awareness of his or her own intentionality ensures the veracity of the observations The etheric world is not a new hypothesis it is however a new domain of observation The authors Jochen Bockemühl Christof Lindenau Georg Maier Ernst August Müller Hermann Poppelbaum Dietrich Rapp and Wolfgang Schad have all written extensively on participatory science and related matters In this ground breaking collection they each explore an aspect of the etheric world and its relationship to human thinking They systematically lead the reader into the formative movements of nature and offer genuine insight into the far reaching mystery of life **The Fern Pharmacy** Robert Dale Rogers, 2025-09-09 Explores more than 500 species of ferns alongside full color photos Examines the Indigenous and folk uses of ferns for food and medicine throughout history Explains in detail the scientific research behind the potency of fern chemicals to heal many human conditions Used for

millennia by Indigenous people for food and medicine ferns are now being recognized scientifically for their unique medicinal potential against antibiotic resistant bacteria cancer diabetes cardiovascular disease and liver kidney and respiratory conditions In *The Fern Pharmacy* Robert Dale Rogers explores more than 500 species of ferns and includes full color photographic examples He presents observations from naturalists from the 18th century until today as he details the traditional Indigenous and folk uses of ferns in North America Europe and Asia as well as their mythology chemistry pharmacology and important healing applications Rogers examines the unique botany of ferns as nonflowering seedless plants including their relationship with mycorrhizal fungi their propagation via spores and their ancient past as colossal trees Interpreting modern research on the chemistry of ferns including in vitro and in vivo studies of their compounds and secondary metabolites he explores their chemical constituents healing properties from easing congestion and anxiety to treating infertility to fighting bacterial infections He also gives examples of how pharmacological researchers are now frequently rediscovering ancient Indigenous wisdom such as how Hammock Fern *Blechnum occidentale* was traditionally used in Brazil for pulmonary ailments inflammation and urinary tract and liver infections and how western maidenhair can be used for rheumatic pain insect stings and mental issues Featuring photographs by Alan Rockefeller and Drew Henderson this book reveals not just the beauty and variety of ferns but also their many modern healing benefits

[What is Biodynamic Wine?](#) Nicholas Joly, 2012-07-09 Nicolas Joly is responsible for producing some of the finest and most highly esteemed wines of France at his Coul e de Serrant vineyard Practising the biodynamic method of agriculture sometimes referred to as premium organic he is at the forefront of a movement to return to the concept of terroir as full expression and embodiment of a particular grape growing locality or appellation Today even expensive wines made under strictly regulated controls and standards are tainted by the use of pesticides and fertilizers and manipulated in the cellar through the use of osmosis and the additions of aromatic yeasts and enzymes To counter such trends a new Charter of Quality run by organic and biodynamic viticulturists guarantees that the appellation comes to full authentic expression To aid this process biodynamic winegrowers like Joly use special planting methods and preparations that enhance and invigorate the soil bringing it into harmony with the forces of sun moon and cosmos to embed the vine in a rich living context
