The Politics Of Drugs From Production To Consumption:

The Politics and Economics of Drug Production on the Pakistan-Afghanistan Border Amir Zada Asad, Robert Harris, 2024-11-01 This title was first published in 2003 This important study contains a detailed socio economic and political description of a region where opium and heroin are both produced and consumed By carefully relating drug production trade and consumption to a relatively inaccessible area on the Pakistan Afghanistan border the book teaches us not only about the area itself fascinating enough particularly since it came into global prominence following the terrorist attack of 11 September 2001 but also about the global dimensions of the problem **The Politics of Drugs** Peadar King, 2003 An estimated 3.1% of the world's population consume illegal drugs This book examines the factors that drive demand and consumption and looks at how individual countries including the U S are dealing with the problem **Drug Policies and the Politics of Drugs in the Americas** Beatriz Caiuby Labate, Clancy Cavnar, Thiago Rodrigues, 2016-07-30 This book is a collection of studies of drug policies in several Latin American countries The chapters analyze the specific histories of drug policies in each country as well as related phenomena and case studies throughout the region It presents conceptual reflections on the origins of prohibition and the War on Drugs including the topic of human rights and cognitive freedom Further the collection reflects on the pioneering role of some Latin American countries in changing paradigms of international drug policy Each case study provides an analysis of where each state is now in terms of policy reform within the context of its history and current socio political circumstances Concurrently local movements initiatives and backlash against the reformist debate within the hemisphere are examined The recent changes regarding the regulation of marijuana in the United States and their possible impact on Latin America are also addressed This work is an important up to date and well researched reference for all who are interested in drug policy from a Latin American perspective The Political Economy of Narcotics Julia Buxton, 2013-07-04 This book explores the origins history and organisation of the international system of narcotic drug control with a specific focus on heroin cannabis and cocaine It argues that the century long quest to eliminate the production trade in and use of narcotic drugs has been a profound failure The statistics produced by the international and domestic narcotic drug control agencies point to a sustained expansion of the drug trade despite the imposition of harsh criminal sanctions against those engaged as producers traffickers or consumers in the narcotic drugs market The roots of this major international policy failure are traced back to the outdated ideology of prohibition which is shown to be counterproductive utopian and a fundamentally inadequate basis for narcotic drug policy in the twenty first century Prohibition championed by many US policy makers has left the international community poorly positioned to confront those changes to the drug trade and drug markets that have resulted from globalisation Moreover prohibition based approaches are causing more harm than good as is demonstrated through reference to issues such as HIV AIDS the environment conflict development and social justice As the drug control system approaches its centenary there are signs that the global consensus

on narcotic drug prohibition is fracturing Some European and South American states are pushing for a new approach based on regulation decriminalisation and harm reduction But those seeking to revise prohibition strategies faces entrenched resistance primarily by the U S This important text argues that successive American governments have pursued a contradictory approach acting decisively against the narcotic drug trade at home and abroad while at the same time working with drug traffickers and producer states when it is in America s strategic interest As a result US policy approaches emerge as a decisive factor in accounting for the failure of prohibition

Drugs Politics Maziyar

Ghiabi,2019-06-20 Iran has one of the world s highest rates of drug addiction estimated to be between 2 and 7 percent of the entire population This makes the questions that this book asks all the more salient what is the place of illegal substances in the politics of modern Iran How have drugs affected the formation of the Iranian state and its power dynamics And how have governmental attempts at controlling and regulating illicit drugs affected drug consumption and addiction By answering these questions Maziyar Ghiabi suggests that the Islamic Republic of Iran s image as an inherently conservative state is not only misplaced and inaccurate but in part a myth In order to dispel this myth he skilfully combines ethnographic narratives from drug users vivid field observations from under the bridge with archival material from the pre and post revolutionary era statistics on drug arrests and interviews with public officials This title is also available as Open Access on Cambridge Core

The Oxford Handbook of Global Drug History Paul Gootenberg,2022 This landmark collection of essays by thirty five historians working on a global scale brings together the latest knowledge and perspectives about the long origins and

transformations of today's illicit drugs such as cannabis, heroin and cocaine *Opium* Pierre-Arnaud Chouvy, 2010-03 Bitter brownish and sticky opium, the sap of the opium poppy *Papaver somniferum* has been cultivated from the earliest of times

The Political Economy of Health Care Development and Reforms in Hong Kong Victor C.W. Wong, 2019-05-23
First published in 1999, this book constitutes a unique account of the development and reform of health care in Hong Kong. Its main focus is on policy developments since 1945. Victor Wong demonstrates the development of a two-tier health system in both a capitalist and Chinese context. His work is one of both health policy and political economy. Wong utilises the latter perspective to show the state's role in the interests of capital, the public demand for health care and the power of the medical profession. Alongside this, Wong brings in the role of Chinese and family medicine and the role of the family in cost containment and minimising the hospitalisation of elderly, frail and chronically ill patients. The volume is the most comprehensive analysis available for health policy in Hong Kong.
