**SELECTED AND INTRODUCED BY
PHILIP CONFORD**

'For philosophy to be at all relevant, it must either increase an understanding of the world or our ability to change it. At best it can do both. This is a test John Macmurray passes with flying colours.'

The Personal World John Macmurray On Self And Society:

The Personal World John Macmurray, Philip Conford, 1996 John Macmurray's philosophy has had an important influence on political thought ethics and education as well as theology and psychology His aims were to reexamine the western philosophical tradition and call into question its origins and inheritance He warned against the political social and religious dangers of outdated thinking and metaphors **John Macmurray's Religious Philosophy** Esther McIntosh, 2016-05-06

Recent dissatisfaction with individualism and the problems of religious pluralism make this an opportune time to reassess the way in which we define ourselves and conduct our relationships with others The philosophical writings of John Macmurray are a useful resource for performing this examination and recent interest in Macmurray's work has been growing steadily A full scale critical examination of Macmurray's religious philosophy has not been published and this work fills this gap sharing his insistence that we define ourselves through action and through person to person relationships while critiquing his account of the ensuing political and religious issues The key themes in this work are the concept of the person and the ethics of personal relations **Not So New Labour** Simon Prideaux, 2005-03-23 New Labour has concentrated many of its social policy initiatives in reinvigorating the family community and work But just how new are the ideas driving policy and practice This book shows how New Labour has drawn on the ideas and premises of functionalism which dominated British and American sociological thought from the 1940s to the 1960s

Community Identity Sebastian Kim, Pauline Kollontai, 2007-09-01 The understanding of identity in relation to community has been a focus of academic studies in recent years An exclusive self understanding of the identity of one's own community coupled with a hostile attitude toward other communities often leads to communal conflicts In particular it is important to notice the significance of religion in the reshaping of community identities in this process This volume focuses first on communal or corporate understanding of identity Secondly this volume will assess the topic of identity from the perspectives of theology and religious studies Thirdly the volume will seek to address the issue of interaction between religious communities and wider society by looking at case studies from the Yorkshire area **The Spirit of the School** Julian Stern, 2009-02-25 Recent interest in personalized learning and the issues raised by Every Child Matters have led to renewed enthusiasm for the more personal and holistic aspects of schooling This fascinating monograph draws on empirical evidence from schools across the world to answer key questions such as What is the spirit of the school How does it differ from school ethos What can teachers and pupils do to contribute to the spirit of the school Drawing heavily on research into learning theories from the social constructivist tradition community from the philosophy of John Macmurray and dialogue from the philosophy of Martin Buber Julian Stern's unique and illuminating book will stimulate fresh thinking about spiritual education

Becoming a Human Engineer Alan Cheville, 2023-11-25 Despite the importance of engineering and technology in economic social and other aspects of our lives what it means to develop as an engineer and how this is to occur is not widely discussed *Becoming a Human Engineer*

explores the moral and ethical challenges of educating engineers through the philosophical lens of personalism a branch of philosophy that puts the person first seeing human growth and development as central to good Building from the philosophy of the 20th century philosopher John Macmurray this book explores how ethics and education intersect through a continuous cycle of action and reflection By pulling together disparate and wide ranging topics across engineering education several promising areas of future work are identified Engineering methods and ways of reflection are deeply embedded in engineering education to the extent that they may interfere with becoming a person A focus on specific knowledges must complement rather than distract from developing the habits of mind necessary for engineers to adapt to a changing world Providing meaningful experiences and explicitly focusing on developing multiple ways to reflect on these experiences are shown to be critical for the holistic development of engineers as persons

A Philosophy of Schooling Julian

Stern,2018-02-19 This book provides an optimistic account of the value and role of schooling Schooling is a common but not universal approach to education and has need of its own distinctive justification in contrast to other approaches such as home based or work based education The book tackles and rejects the various large scale functional theories of schooling which continue to dominate current debates and policies such as schooling supporting employment and the economy or developing citizenship Instead it argues that schooling and schools should be viewed as places to learn community within and through community The lived reality of relationships within schools based on care and curiosity is as strong as ever and upon this foundation is built an original philosophy of schooling This reflective book will appeal to students and scholars of philosophy of education and to all professionals concerned with schools

The Art of Being Human Deborah

Ravetz,2016-11-21 Deborah Ravetz explores the territory of our inner landscape by showing us that it is only through embracing and working with all aspects of our selves including our vulnerability and pain that we give meaning and experience joy Through telling her own story and those of others who have faced their demons and worked through their struggles she helps us to embark on the journey that all of us need to make in order to become fully ourselves Packed with applicable strategies for spiritual development and practice this book serves to empower and cultivate holistic wellbeing

Joyful Exiles James M. Theology as History and Hermeneutics Laurence W. Wood,2005 This book offers in style and content an exciting new perspective on contemporary theology and its future in post modern times I welcome this new perspective The style is agreeable unpolemical and engages in dialogue with the best of Barth and Bultmann Ricoeur and Pannenberg Cobb and Moltmann showing what they have to offer to the larger theological community and transferring it like a ferry boat into the post modern age The purpose is to offer an evangelical theology which is at the same

time genuinely evangelical and relevant for post modern ways of thinking Wood writes with admirable clarity J rgen
Moltmann University of T bingen
