The Planet Girded Suns Mans View Of Other Solar Systems

John Ross Jr.

The Planet Girded Suns Mans View Of Other Solar Systems:

The Planet-Girded Suns: Our Forebears' Firm Belief in Inhabited Exoplanets Sylvia Engdahl, 2012-06-01 Interest in exoplanets the worlds of other stars is not new From the late 17th century until the end of the 19th almost all educated people believed that the stars are suns surrounded by inhabited planets a belief that was expressed not in science fiction but in serious speculation both scientific and religious as well as in poetry Only during the first half of the 20th century was it thought that life bearing exoplanets are rare This is not a science book rather it belongs to the category known as History of Ideas First published by Atheneum in 1974 it tells the story of the rise fall and eventual renewal of widespread conviction that we are not alone in the universe In this 2012 updated edition the chapters dealing with modern speculation have been revised to reflect the progress science has made during the past 40 years including the actual detection of planets orbiting other stars However it is not intended to be more than a brief introduction to today s views its focus is on little known facts about those of the past Why should we care what our forebears believed Now the question of ET life is a matter for investigation by science Yet it s significant that most educated people of past centuries were convinced that other inhabited worlds exist without any scientific evidence whatsoever This historical fact reveals that human beings have an instinctive sense of kinship with the wider universe and a desire to see the realms that lie beyond this one small planet and perhaps eventually to go there Our ancestors conceived of such voyages only in a spiritual sense as occurring after death But we who have taken our first small steps into space are aware that our descendants may set foot on the worlds of other suns Just as in the 17th century people were initially upset by the new knowledge that the stars are suns scattered in space rather than lights fixed to a nearby sphere the growing awareness that Earth is not safely isolated from whatever lies beyond makes many of our contemporaries uneasy Thus today s predominant feelings about spaceships are ambivalent Nevertheless if an impulse toward belief that we are not alone in the universe is indeed an innate characteristic of human beings as the past spread of belief in inhabited exoplanets suggests we can be sure that those who follow us will not turn back from becoming spacefarers *NASA EP. United States. National Aeronautics and Space Administration, 1968* *Reflections on Enchantress from the Stars and Other Essays* Sylvia Engdahl, 2019-10-31 Here are the author s collected essays about her Newbery Honor book *Enchantress from the Stars* and other Young Adult and adult science fiction novels plus two autobiographical essays Her comments on *Enchantress* deal with issues she would like all its readers to be aware of This is one of three books of essays that replace *Reflections on the Future Collected Essays* which has grown too long and covers too many topics Most of the essays included appeared there so if you already have that book you don t need this one The other two replacement books including a number of new essays are focused on space and on the human mind **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1976 **The Writers Directory** , 2013 *The Baker & Taylor Elementary School Selection Guide* , 1976 **From This Green Earth: Essays on Looking Outward** Sylvia

Engdahl,2024-05-03 Sylvia Engdahl became fascinated by the idea of space travel in 1946 and has believed since the early 1950s that expansion of our species to other worlds is vital to the preservation of Earth and the future survival of humankind Many of the essays in this book express her conviction that we should not be discouraged by the public s reluctance to support space activity since all past human progress has been brought about by visionaries who did not have the backing of their contemporaries The shock of realizing during the moon landings that contact with the vast and perhaps peril fraught universe is no longer mere fiction dampened the enthusiasm of the majority but this was a natural reaction comparable seventeenth century people s resistance to the idea that Earth is not as formerly thought safely enclosed within crystal spheres that hold up the celestial bodies It will pass and we need have no doubt that generations who come after us will venture forth from this green Earth and find their way to the stars The following essays are included The Once and Future Dream new Thoughts on the 50th Anniversary of the First Moon Landing Breaking Out from Earth s Shell Why Does the History of Outlook Toward Space Matter Confronting the Universe in the Twenty First Century Space and Human Survival The Only Sensible Way to Deal with Climate Change Update on the Critical Stage The Far Side of Evil s Relevance Today Space Colonization Faith and Pascal s Wager Why There Will Never Be an Interplanetary War Humankind s Future in the Cosmos *Children's Books Suggested as Holiday Gifts* New York Public Library,1975 Vol for 1960 contains a retrospective list 1910 1959 **Science & Religion** John Ross Jr.,2016-12-19 Science and Religion Interpersonal Dialogue Discussion and Debate is a unique handbook for college students and adults interested in exploring the persuasive and rhetorical strategies surrounding todays fashionable topics in science and religion Offered in three accommodating sections John Ross presents valuable chapters on Humans Communication and Language the Importance and Meaning of Interpersonal Dialogue and a very timely chapter entitled Avenues of Dialogue Dissimilarity Discord and Alliance Part II explores captivating issues surrounding Faith the After Life Apologetics and Atheistic Scientism There is also an innovative section on the human brain higher intelligence and even on the questionable phenomena of neuroethology UFO cults and the disputable God Helmet The final chapters explore contemporary miracles creation accounts astrobiology and the current challenges surrounding SETI in its quest for extraterrestrial life Ross eloquently addresses the possibilities of alien life and the resulting consequences and challenges it brings for Biblicists in the world of Christian fundamentalism The book also includes a synopsis of the major world religions and a final section entitled Group Presentation Models in Science and Religion This handbook is unique in that it smartly combines principles of communication rhetoric and public speaking with contemporary issues in science theology and religion *Children's Books and Recordings Suggested as Holiday Gifts* ,1974
