Police – Community Relations (JUST A434)

At the heart of democratic governance are notions of limited authority, equality before the law, citizen voice and participation, legitimacy, and consent. Due to their unique capacity to use force in order to obtain compliance, and because they represent an embodiment of governmental power and authority to most citizens, the police represent an institutional site of ongoing social and cultural conflict. In this course we will explore the nature of the relationships that exist between police and the many "publics" they serve, the factors that influence and give shape to those relationships, and to evaluate the implications of police – community relations for policing a democratic society.

The Police and Their Many Publics Donald W. McEvoy, 1976 *The Police and the Public* Albert J. Reiss, 1971-01-01

Ways we can make our society more civil our police more humane our population more responsible Sociology Cuts closer to the bone of truth about the police in America than any book I have read NY Times Book Review *The Police, Public Order and the State* John D Brewer, 2016-07-27 Are police forces agents of the state or of society How do different police forces maintain order How does the nature of a country's political system affect the state's reaction to disorder This study identifies trends in public order policing across a broad sample of seven countries Britain Northern Ireland the Irish Republic the United States of America Israel South Africa and China It explains why the handling of disorder has become a controversial and topical issue in different parts of the world Each chapter provides a range of data on the size make up and cost of the police and follows a common format in analysing the place of the police at the junction of state society relations **The**

Policing Web Jean-Paul Brodeur, 2010-09-30 Nearly all research devoted to policing focuses on public uniformed police and their legal use of force An overwhelming amount of this work draws on evidence from Anglo American police forces These twin emphases have led to a limited view Agencies such as criminal investigation units intelligence services private security companies and military policing organizations have almost entirely escaped scholarly attention In *The Policing Web* Jean Paul Brodeur looks at policing as a whole He illuminates its full diversity showing how it extends far beyond the confines of public police working in uniform and visible to all Brodeur considers military policing both when it complements the values of democracy and when it does not He also discusses criminal individuals acting as police informants and criminal organizations enforcing their own rules in urban zones deserted by the police Brodeur argues that the diverse strands of the policing web are united by a common definition that emphasizes the license granted to policing agencies legally or with impunity to use means otherwise forbidden to the rest of the population Employing an international and comparative approach Brodeur establishes a comprehensive model that links all the components of policing The policing web however is not a neat and well integrated structure There is not just one policing web There are several depending on the country police history and culture and the various public images of policing These often overlooked factors are essential components of the context of policing Wide ranging and authoritative *The Policing Web* expands the very idea of what policing is and how it works and presents a novel yet fundamental understanding of law enforcement **Public Housing in Newark's Central Ward** United States
