

Question 2:

a) What are the characteristics of focus group and depth interviews?

A focus group is an interview conducted by a trained moderator in a nonstructured and natural manner with a small group of respondents. The moderator leads the discussion. The main purpose of focus groups is to gain insights by listening to a group of people from the appropriate target market talks about issues of interest to the researcher.

Characteristics of Focus Groups	
Group size	8 to 12
Group composition	Homogeneous; respondents prescreened
Physical setting	Relaxed, informal atmosphere
Time duration	1 to 3 hours
Recording	Use of audiocassettes and videotapes
Moderator	Observational, interpersonal, and communication skills of the moderator

Depth interviews are another method of obtaining qualitative data. We describe the general procedure for conducting depth interviews and then illustrate some specific techniques.

Characteristics

Like focus groups, depth interviews are an unstructured and direct way of obtaining information, but unlike focus groups, depth interviews are conducted on a one-on-one basis. A depth interview is an unstructured, direct, personal interview in which a single respondent is probed by a highly skilled interviewer to uncover underlying motivations, beliefs, attitudes, and feelings on a topic. A depth interview may take from 30 minutes to more than one hour.

b) Under what circumstances FGD is preferable to depth interview.

There are variety of methods to conduct qualitative research to help understand consumer's opinions, beliefs, attitudes & perceptions on a given subject of interest. The most common ones being Focus group discussions and Depth interviews. Focus Groups are a group of interacting individuals, brought together by a moderator or interviewer, who drives the group and its interaction to gain information about a specific research topic. While in-depth interviews are where researcher interacts with respondents on an individual level, one consumer at a time. Both methods are equally important & effective. One or the other or both needs to be employed, depending on the Research objectives and Target segments to be researched. Focus group is recommended when the client wants to gain multiple perspectives, unfiltered feedback of a large group. In focus groups, participants get involved in the brainstorming activity which leads to generating ideas as participants get opened and truly and freely share feelings/perceptions upon the subject as per their experiences. When one participant's opinion/perception feeds off another opinion/perception and so on, the group discussion can really dig deep into the issue. Focus groups are generally required at concept development stage or when the product is an innovation in the market and for products which entail group decision-making. While in-depth interviews are recommended when client wants to understand individual decision processes. It gives a chance to explore detailed perceptions, opinions, beliefs, attitudes and decisions and compare differences and similarities among reference group members. It is valuable when researchers want individual reactions placed in the context of the individual's experience. However, focus groups becomes impractical in a few situations as follows: Too many segments to cover, Respondents too spread out – so can't get them to a central location Too intimate a topic to discuss in open – not suited for a focus group, Need to understand each respondent's practices in depth – say, at different stages of their life. In such situations, the

Technology Application in the Tourism and Hospitality Industry of Bangladesh Azizul Hassan, 2021-10-06. The tourism and hospitality industry of Bangladesh as a South Asian country has potential. Sustainable development of this industry in this country is on the move. Still there are some hindrances which appear to be stymieing this industry's overall development potential. Overcoming such hindrances can be partly enabled by applying digital innovation and introducing more Internet based platforms in the country's tourism and hospitality industry. The country is believed to have emphasized innovative technology application in this industry but technology applications in this industry in Bangladesh have so far attracted very few researchers resulting in insufficient contributions and very limited knowledge. This book therefore can make a significant contribution towards the very limited knowledge in this identified research area. On the specific ground of technology application in the tourism and hospitality industry the book covers concepts and context, the present scenario, product and service offers and an analysis of the roles of public and private institutions. On related issues the book also covers social media networking and connectivity, sustainability practices and climate change effects, tourist experiences, developments and challenges, suggestions and future research directions. The book is expected to appeal to general readers as well as researchers with an interest in technology applications in the tourism and hospitality industry. This book is also an essential read for the relevant policy planners and industry professionals. Bangladesh David Lewis, 2011-12-07. Since its hard won independence from Pakistan Bangladesh has been ravaged by economic and environmental disasters. Only recently has the country begun to emerge as a fragile but functioning parliamentary democracy. The story of Bangladesh told through the pages of this concise and readable book is a truly remarkable one. By delving into its past and through an analysis of the economic, political and social changes that have taken place over the last twenty years the book explains how Bangladesh is becoming of increasing interest to the international community as a portal into some of the key issues of our age. In this way the book offers an important corrective to the view of Bangladesh as a failed state. **Handbook of Research on Contemporary Storytelling Methods Across New Media and Disciplines** Mih?e?, Lorena Clara, Andreescu, Raluca, Dimitriu, Anda, 2021-01-15. Stories are everywhere around us from the ads on TV or music video clips to the more sophisticated stories told by books or movies. Everything comes wrapped in a story and the means employed to weave the narrative thread are just as important as the story itself. In this context there is a need to understand the role storytelling plays in contemporary society which has changed drastically in recent decades. Modern global society is no longer exclusively dominated by the time tested narrative media such as literature or films because new media such as videogames or social platforms have changed the way we understand, create and replicate stories. The Handbook of Research on Contemporary Storytelling Methods Across New Media and Disciplines is

a comprehensive reference book that provides the relevant theoretical framework that concerns storytelling in modern society as well as the newest and most varied analyses and case studies in the field The chapters of this extensive volume follow the construction and interpretation of stories across a plethora of contemporary media and disciplines By bringing together radical forms of storytelling in traditional disciplines and methods of telling stories across newer media this book intersects themes that include interactive storytelling and narrative theory across advertisements social media and knowledge sharing platforms among others It is targeted towards professionals researchers and students working or studying in the fields of narratology literature media studies marketing and communication anthropology religion or film studies Moreover for interested executives and entrepreneurs or prospective influencers the chapters dedicated to marketing and social media may also provide insights into both the theoretical and the practical aspects of harnessing the power of storytelling in order to create a cohesive and impactful online image
