Anders Hjort-af-Ornas,2007-12-13 This book concerns footprints of the international environmental conventions in action

Hydropower projects have been selected as test case The study is based on participatory research into a number of cases where implementation needs to meet new data requirements made by policy makers It is not about findings on hydropower in studies whether consultancies or other kind Results in the various parts are accordingly not presented here other than to sometimes illustrate how they reflect on sustainable development The locations of projects are not even given by maps since the purpose is to see how response to changes in environmental policy may give rise to changes in methodologies The main issue is abstract in this sense with focus on how sustainable development may be implemented using hydropower as an example The global environmental conventions are seen in this study as drivers and the activities reflected on are just that reflections that seek to respond and lift policy into implementation style The purpose when making references to a specific set of studies is not to look for their results but for design how experience is brought into policy formulation to supervise the evaluator in turn to respond with new types of information for project implementation The study is requested by Sida the Swedish International Development Agency

Kabir Hassan, 2013-12-16 This book discusses the idea that there is a specific Islamic form of entrepreneurship Based on extensive original research amongst small and medium sized enterprises in Saudi Arabia it shows how businesses are started and how they grow in the context of an Islamic economy and society It argues that as specific Islamic approaches to a wide range of economic activities are being formulated and implemented there is indeed a particular Islamic approach to entrepreneurship Examining the relationship between Islamic values and entrepreneurial activity the book considers whether such values can be more effectively used in order to raise the profile of Islamic entrepreneurship and also to promote alternatives to development in the contemporary business environment The book analyses the nature of entrepreneurship and the special qualities of Islamic entrepreneurship and discusses how the Islamic approach to entrepreneurship can be encouraged and developed further still
