Small Hands In South Asia Child Labour In Perspective:

Small Hands in South Asia Georges Kristoffel Lieten, Ravi Srivastava, Sukhadeo Thorat, 2004 Published in association with Indo Dutch Programme on Alternatives in Development Child labour has become a hot issue International attention has often been focused on South Asia and initiatives have been undertaken to use pro active policies such as a trade boycott to pressurise governments in India Pakistan Nepal and Bangladesh to implement a complete ban on child labour and to realize universal education A gathering of outstanding international scholars financed by the Indo Dutch Programme on Alternatives in Development has discussed these issues on the basis of empirically grounded research papers A selection of these papers has been edited for this volume The volume contains papers on the extent of child labour in South Asia and the spread across regions and sectors its correlation with education some of the worst forms of child labour and best practices The papers are a good mix of social anthropology economics and political science approaches The expertise of the contributors and their concern for what continues to be a stark reality in South Asia make this book an invaluable source of reference on the issue of child labour academically rigorous and politically relevant It will be highly relevant to policy makers scholars journalists and practitioners Institutional Design for Tackling Child Labour Problem D. Rajasekhar, K. G. Gayathri Devi, V. Anil Kumar, 2011 Study and evaluation of the child labor program in the state of Karnataka *The World of Child Labor* Hugh D. Hindman, 2009 This definitive resource details both the current and historical state of child labor in each region of the world focusing on its causes consequences and cures Including contributions by an international team of leading child labor scholars researchers policy makers and activists as well as a wealth of current statistical data it is the most comprehensive reference available on the subject **Hazardous Child Labour in Latin America** G.K. Lieten, 2011-01-21 In order to bridge the lack of information on child labour and to stimulate policy interventions the IREWOC Foundation International Research on Working Children has undertaken action based research in the field of the worst forms of child labour in Latin America In 2006 and 2007 a comparative study on the Worst Forms of Child Labour was carried out in 7 different economic sectors in Bolivia Guatemala and Peru focussing on the hazardous worst forms The central research objectives were as follows to map the working and living situations of children who are working in specific economic sectors and what the consequences of this work are for their physical and emotional wellbeing to investigate the reasons why these children are working in these worst forms sectors The research results were expected to give important insights into the currently polarised debate between those who state child labour is above all related to cultural considerations and those who state that economic reasons are fundamental to the phenomena of child labour to map the existing policy initiatives for child labourers in the worst forms and to identify the best practices In the face of challenges imposed by achieving the Millennium Development Goals MDGs set by the UN specific attention was paid to educational initiatives Is education a useful tool in combating child labour and vice versa is child labour a significant obstacle to achieving universal primary education Although

the evidence from the various cases discussed in the book illustrate positive trends in terms of the worst forms of child labor thousands of children were still found to be engaged in activities that form a direct threat to their physical mental and moral health and jeopardize their education This book proposes several practical recommendations for possible interventions

Enslaved Innocence Shakti Kak,Biswamoy Pati,2012 Enslaved Innocence Child Labour in South Asia explores the historical economic and social factors surrounding the issue of child labour It is often argued that child labour is the result of under development large families or cultural practices This volume attempts to highlight the structural factors in capitalist societies that have made such exploitation possible and to place the issue of child labour in a theoretical framework relating to capitalist modes of production and the need for the generation of surplus for capital accumulation Extremely exploitative labour processes bring out the supply and demand factors of child labour The persistence of child labour in an era of high growth and high unemployment levels amongst adult men and women points to an economic system based heavily on exploitative labour relations As we move further into the twenty first century the existence of child labour in the world is a reality which must be faced It is within this context that the present volume takes into consideration the changing global economic conditions and focuses on issues and strategies for the eradication of child labour

Child Labour Georges Kristoffel Lieten,2005 Explores the issues surrounding child labor worldwide and offers solutions and a plea for more research to be done

Rights and Wrongs of Children's Work Michael Bourdillon,Deborah Levison,William Myers,Ben White,2010-11-10 Rights and Wrongs of Children s Work authored by an interdisciplinary team of experts incorporates recent theoretical advances and experiences to explore the place of labor in children s lives and development This groundbreaking book considers international policies governing children s work and the complexity of assessing the various effects of their work The authors question current child labor policies and interventions which even though pursued with the best intentions too often fail to protect children against harm or promote their access to education and other opportunities for decent futures They argue for the need to re think the assumptions that underlie current policies on the basis of empirical evidence and they recommend new approaches to advance working children s well being and guarantee their human rights Rights and Wrongs of Children s Work condemns the exploitation and abuse of child workers and supports the right of all children to the best quality free education that society can afford At the same time the authors recognize the value and sometimes the necessity of work in growing up and the reality that a workless childhood without responsibilities is not good preparation for adult life in any environment

Child Labor and the Urban Third World Subrata Sankar Bagchi,2010-11-22 The Third World cities have been reinvented by the forces of globalization as the destinations of new investments causing the migration of a teeming million to the major urban centers without any corresponding increase in the creation of new jobs and other basic amenities required for decent living The problem of child labor has also been exacerbated to an unprecedented level in the urban areas of the Third World countries during this period Yet the dominant

discourses on this problem have come from the Western observers or have some prior Western presence in its understanding of the problem which defers the Third Worldly understanding of the situation. The author argues that a paradigm shift is needed to incorporate various local discourses in order to effectively address the problem of child labor. Based on a decade of fieldwork among the poor and marginalized population in the city of Kolkata, Child Labor and the Urban Third World will give readers an idea of how this problem has become inextricably bound with various other local conditions such as the security of tenure in the houses.

Childhoods in South Asia Deepak Kumar Behera, 2007. This unique two part volume focuses on extensive ethnographic examination of the lived experience of children in the political culture and economic contexts of the countries in South Asia. Part I presents ethnographic studies of childhood experience. *Children Rights and Wellbeing in India* Joseph A. Gathia, Sanjay V. Gathia, 2015-01-01. India has emerged as one of the fastest growing markets in the world. But what does it mean to its children? Of total estimated population in 2014 as 1.236 billion, nearly 28.5% are below age of 14 years. Despite such a huge child population in India, the issues that affect their lives and even survival tend to receive remarkably little attention. This study, *Children's Rights and Wellbeing in India: Law, Policy and Practice*, Volume I, II, and III is one among the few to address this theme on such a wide canvas that spans both time frame and issues. There has been a growing interest over the past decade in the concept of child's rights among policy makers, practitioners and academics in both India and internationally. But does it mean the same thing to children and families as it does to policy makers? How can it be measured? And if it has begun to impact on government policy, has it made any difference to children's lives? The three volume study, *Children's Rights and Wellbeing in India*, provides an overview of key child development policies, programmes, laws, trends and raises pertinent questions about their potential impact on children's rights. The challenges of improving children's wellbeing go beyond the provision of more effective public services; important though these are. The bigger questions are: how can we create a society in which children are better valued and parents better supported in bringing up their children? And what can be done to reduce inequalities which influence every aspect of children's wellbeing? This book makes use of a variety of sources of data including that of Govt of India, the World Bank and UN agencies, particularly the UNICEF and the ILO. All the three volumes of *Children's Rights and Wellbeing in India* are an essential text for all those who want to understand the crisis threatening our children's future.

Asian Informal Workers Santosh K. Mehrotra, Mario Biggeri, 2007-01-24. This is a thoroughly researched volume edited by key specialists in the field along with an impressive team of contributors that surveys the nature and extent of informal home work in Asia, examining and arguing for protection of the workers who are exploited.

The Indian Journal of Public Administration, 2007. *Economic and Human Development in Contemporary India* Debdas Banerjee, 2009-12-16. This book deals with issues in economic development in India. It highlights those factors that are indicative of India's emergence in the global economy yet indicates negative trickle down effects such as malnutrition, poverty, bonded labourers, high adult unemployment and the widespread use of child labour.

Focusing on structural deficiencies for a steady growth rate and how to make growth inclusive the book examines duality in development and the factors standing between national economic prosperity and human development The author analyses issues concerning international trade technology access to food inequality and poverty and the catching up of developing countries A novel approach to the analysis of the Indian economy and other developing countries in the 21st century this book advocates development as a form of governance With India as a case study this book provides a solid framework for looking at developing economies which will be useful to policy makers and to graduate and post doctoral students and researchers in the areas of development studies and economics industrialisation and structural change *Coolies, Capital and Colonialism* Rana P. Behal, Marcel van der Linden, 2006 Endogamy the custom forbidding marriage outside one's social class is central to social history This study considers the factors determining who married whom whether partner selection changed over the past three hundred years and regional differences between Europe and South America **Education and Inequality in India** Manabi. & MOOIJ MAJUMDAR (Jos), 2010 **Imagining Childhood, Improving Children** Catriona Ellis, 2023-08-24 From as early as the 1920s state policy towards children in South India was framed through the lens of a universal ideal of modern childhood This reflected the participation of policy makers and civil society activists in global discourses of child saving and the new opportunities of governance under the constitutional reforms of 1919 Children became viewed as both objects to be saved and investments as future citizens The book considers how adults used this concept of universal childhood to conceptualise themselves as both modern and avuncular gaining authority through an appropriation of familial terms as well as the claim to modern scientific expertise Through a detailed study of education health and juvenile justice the book reveals that the implementation of policy was still informed by other markers of difference and contrasts adult intentions with the autobiographical memories of school family and peer relationships

Education and Inequality in India Manabi Majumdar, Jos Mooij, 2012-10-02 This book focuses on primary education in India and interrogates what schooling means and does to children from weaker sections of Indian society and which values underpin the school system It examines whether the concept of education for all is just a mechanically conceived policy target to chasing enrolment and attendance or whether it a larger social goal and a deeper political statement about the need for attacking entrenched social inequalities and above all an affirmation of the idea that schooling has a liberating potential Drawing on original data collected in the two states of Andhra Pradesh and West Bengal the authors first present the multiple ways in which social class impinges on the educational system educational processes and educational outcomes In the second part of the book issues around autonomy and accountability are explored via an analysis of the position of teachers within the educational hierarchy and by looking at the various possibilities of making teachers accountable The last part centres on the learning process with a particular focus on the classroom The conclusion includes recommendations that are related to the necessity for a larger debate and normative framework which includes private schools as possible partners

in the pursuing of a public good for which a public entity should take some responsibility and in conjuncture to that the necessity to move from government action and responsibilities to a broader concept of public action Provided by publisher

Advancing the Campaign Against Child Labor ,2002 **Advancing the Campaign Against Child Labor, Vol. 2, Etc., 2002** ,2003 Globalisation, Industrial Restructuring and Labour Standards Debdas Banerjee,2005-07-13 This book analyses the current conditions of work in the Indian factory sector and provides a critical analysis of the wage profit and productivity behaviour in India s organised manufacturing sector over the last two decades Examining the specificities of the conditions of industrial workers it addresses three major questions What has happened to the relative shares of profits and wages How do we explain the levels and changes and Are better labour standards antithetical to the project of industrial restructuring The author also examines the problem of industrial restructuring in India within the broader context of power and inequality in the workplace He argues that even though the existing laws mandate decent labour conditions India has been unable to implement them because of the minimalist position taken by successive governments Providing new and fascinating insights into industrial growth labour standards and development in the framework of globalisation this book will interest students and scholars of economics economic history political science and sociology as well as students of management and labour relations
