Smoking A Behavioral Analysis Pergamon General Psychology Series:

Smoking Bernard Mausner, Ellen S. Platt, 2013-10-22 *Smoking A Behavioral Analysis* is written by two experimental social psychologists. It focuses on the psychological aspect of smoking and the effects that role playing has on it. Comprised of two parts, the first part deals with the reasons that people begin and continue smoking, the environmental and intra-individual support for smoking, the relationship of these supports and the values and expectations concerning the effects of smoking. The second part details an experiment that uses role playing to induce a change in smoking. It includes the background, design, procedure, and the implications of the experiment in the research and control of smoking. The book is a valuable reference for psychologists, medical doctors, experts, and lay people interested in smoking, smoking cessation, and the relationship of behavior to this habit.

Behavioral Approaches to Community Psychology Michael T. Nietzel, Richard A. Winett, Marian L. MacDonald, 2013-10-22 *Behavioral Approaches to Community Psychology* reviews and evaluates the extension of social learning procedures to various demanding community problems. This book presents the applications of the behavioral paradigm for various social problems including alcoholism, adult offenders, aging, unemployment, drug addiction, juvenile delinquency, environmental protection, psychiatric residence, and problems of the schools. Organized into 12 chapters, this book begins with an overview of the development and patterning of human behavior. This text then examines various research conducted in schools concerning behavioral approaches to educational problems. Other chapters consider the increasing concern and debate for the problems of crime and delinquency. This book discusses as well the concern of the society about opiate drug addiction and abuse. The final chapter deals with the strengthened relation between behaviorists and community psychologists. This book is a valuable resource for social psychologists and graduate students. Applied researchers and practitioners in community health settings will also find this book useful.

Ecological Assessment of Child Problem Behavior: A Clinical Package for Home, School, and Institutional Settings Robert G. Wahler, Alvin E. House, Edward E. Stambaugh, 2013-10-22 *Ecological Assessment of Child Problem Behavior: A Clinical Package for Home School and Institutional Settings* discusses sampling methods to assess the problem child's behavioral interactions in the environment of the real world. The book focuses on the following facets of ecological assessment: 1) format of interview for the stage during the observational sampling procedures; 2) use of an observational procedure by adult members of the child's natural community; and 3) the employment of a standardized category coding system. In general, the book deals with devising a standardized category codes that will be used in direct observations of a clinical nature. The book shows that investigators of various theoretical merits attempt to construct category systems to systematize coding behavior such as those of Heyns and Lippitt 1954, of Baker and Wright 1955, or of McGrew 1972. The authors enumerate the category codes to describe different aspects of children's social environments and their common behaviors that result from these settings. Behavioral scientists, psychiatrists, child psychologists, students, and professors in the sciences of human behavior, particularly concerning children,

are encouraged to read this book **Human Behavior and Public Policy** Marshall H. Segall, 2013-10-22 Human Behavior and Public Policy A Political Psychology examines knowledge about human behavior and its application to public policy analysis It shows that the findings of psychological research provide information on how to better understand social problems and formulate and implement policies for the solution of such problems Organized into nine chapters the book first discusses how psychology can be used to shape society into a better home and then presents three models for political psychology The next chapters deal with intellectual capacities educability and prejudice and discrimination in different groups of people The book also explores violence and intergroup conflict resolutions and concludes with a proposal for a research design that serves as an example of political psychological planning Academic psychologists who teach interdisciplinary social sciences and courses concerned with public affairs will find this book invaluable *Interpersonal Communication* Kurt Danziger, 2016-06-06 Interpersonal Communication focuses on the basic processes of interpersonal communication emphasizing the importance of reciprocal influence processes in face to face interaction The topics discussed in this book include the manipulation of interpersonal communication dual aspect of human communication dimensions of social interaction nonverbal communication and social interaction in subhuman primates The psychotherapy as interpersonal communication study of disturbed communication in families and development of interpersonal communication in children are also deliberated This text likewise covers the cultural differences in interpersonal communication and study of interpersonal processes This publication is intended for social psychologists but is also a good reference for those working in related disciplines that require a social psychological treatment of the subject **Prescriptive Psychotherapies** Arnold P. Goldstein, Norman Stein, 2013-10-22 Prescriptive Psychotherapies describes a prescriptive approach to psychotherapeutic treatment At the heart of this prescriptive model is the patient X therapist X treatment interactionist view of the question Which type of patient meeting with which type of therapist for which type of treatment will yield which outcomes The diagnostic research and therapeutic implications of this viewpoint are examined Attention is also devoted to the question of how prescriptive psychotherapy research might be most advantageously conducted to yield prescriptive information leading to increasingly successful treatment outcomes This book is comprised of 15 chapters and begins by explaining the value and development of prescriptive psychotherapies and suggesting a schema for both conceptualizing and generating investigations that may yield progressively more useful psychotherapeutic prescriptions The next chapter considers the views of others regarding issues bearing upon the prescriptive process particularly the role of diagnosis The treatment and research implications of psychological testing are then explored along with the role of assessment in behavior modification Several of the key issues in the process of achieving effective application of the integrated insight behavioral approach to psychobehavioral counseling and therapy are also examined Examples of clinical prescriptions of prescriptive psychotherapies are given including psychoneuroses psychophysiological disorders and sexual deviations This monograph is
