educational source of material in developing expertise but also as an invaluable toolkit to support practical application of ethical thinking Declan Brady President of the Irish Computer Society and a member of the Board of Directors of the Council of European Professional Informatics Societies Digital technology is about people It is about those who plan develop and implement applications which other people use and are affected by It is about the impact on all these people as well as on the world at large Ethical Digital Technology in Practice takes a real world perspective to explore these impacts over time and discover ways in which to promote ethical digital technology through good practice It draws upon the author's published articles in trade magazines professional journals and online blogs These are synthesised into a blueprint which addresses in a practical manner the societal issues surrounding the increasing use and abuse of digital technology It is a follow up book to the author's book The Evolving Landscape of Ethical Digital Technology which has a researcher's perspective This book is a hands on account of the computer revolution from 1995 to the current day when the world is increasingly dependent on digital technology It explores some of the social and ethical issues that are part of this revolution This is not a book about deep philosophical and technical concepts Nor does it claim to be comprehensive It is the author's personal account of technological change and its effects on people It is written by a boy who was smitten by computer technology at the age of 15 became a computer professional and subsequently spent many years showing young people how to develop and use digital technology in a good way It is a book based upon the author's engagement with practitioners academics and students during the period as well as his continued fascination with this fantastic technology Ethical Digital Technology in Practice is a book about the real world of what has happened and what might happen as digital technology continues to pervade

*Designing Enterprise Applications with the J2EE Platform* Inderjeet Singh, 2002 Following her widely acclaimed Autobiography of Red A spellbinding achievement Susan Sontag a new collection of poetry and prose that displays Anne Carson's signature mixture of opposites the classic and the modern cinema and print narrative and verse In Men in the Off Hours Carson reinvents figures as diverse as Oedipus Emily Dickinson and Audubon She views the writings of Sappho St Augustine and Catullus through a modern lens She sets up startling juxtapositions Lazarus among video paraphernalia Virginia Woolf and Thucydides discussing war And in a final prose poem she meditates on the recent death of her mother With its quiet acute spirituality its fearless wit and sensuality and its joyful understanding that the fact of the matter for humans is imperfection Men in the Off Hours shows us the most exciting poet writing in English today Michael Ondaatje at her best From the Hardcover edition

*Handbook of Research on Intrusion Detection Systems* Gupta, Brij B., Srinivasagopalan, Srivathsan, 2020-02-07 Businesses in today's world are adopting technology enabled operating models that aim to improve growth revenue and identify emerging markets However most of these businesses are not suited to defend themselves from the cyber risks that come with these data driven practices To further prevent these threats they need to have a complete understanding of modern network security solutions and the ability to manage address and respond to security breaches The

Handbook of Research on Intrusion Detection Systems provides emerging research exploring the theoretical and practical aspects of prominent and effective techniques used to detect and contain breaches within the fields of data science and cybersecurity. Featuring coverage on a broad range of topics such as botnet detection, cryptography, and access control models, this book is ideally designed for security analysts, scientists, researchers, programmers, developers, IT professionals, scholars, students, administrators, and faculty members seeking research on current advancements in network security technology.

**Program Debugging Environments** Beatrice Lazzerini, Lanfranco Lopriore, 1992

**Smart Card Research and Advanced Applications** Emmanuel Prouff, 2011-12-12. This book constitutes the thoroughly refereed post-conference proceedings of the 10th IFIP WG 8.8.11.2 International Conference on Smart Card Research and Advanced Applications (CARDIS 2011) held in Leuven, Belgium, in September 2011. The 20 revised full papers presented were carefully reviewed and selected from 45 submissions. The papers are organized in topical sections on smart cards, system security, invasive attacks, new algorithms and protocols, implementations, and hardware security, non-invasive attacks, and Java card security.

**Smart Card. Research and Applications** Jean-Jacques Quisquater, Bruce Schneier, 2006-12-30. Smart cards have been driven by the need for a secure, portable computing platform. Hence, it is no surprise that security considerations dominated their research. The CARDIS conferences were created to provide a forum for this research. CARDIS 1998 is the third international conference on Smart Card Research and Advanced Applications held in Louvain-la-Neuve, Belgium, 14-16 September 1998. The first CARDIS was held in Lille, France, in November 1994, and the second was held in Amsterdam, The Netherlands, in September 1996. The fourth CARDIS is scheduled to take place in Bristol, UK, in September 2000 (<http://www.cardis.org>). This volume contains the refereed papers presented at CARDIS 1998. These 35 papers were first published in a pre-proceedings and distributed to the attendees at the conference; they have subsequently been revised and updated for this volume. The papers discuss all aspects of smart card research: Java cards, electronic commerce applications, efficiency, security, including cryptographic algorithms, cryptographic protocols, and authentication and architecture. Submissions from Europe, the U.S., Asia, and Australia show that this is indeed an international area of research and one that is becoming more popular as practical demand for smart cards increases. We wish to thank the Program Committee members who did an excellent job in reviewing papers and providing feedback to the authors.
