Instead Jan Nederveen Pieterse argues that we are witnessing the formation of a global m lange culture through processes of cultural mixing or hybridization. From this perspective on globalization conflict may be mitigated and identity preserved albeit transformed. In a new chapter on China the author focuses on the key issue of agency and power in hybridization. Throughout the book offers a comprehensive treatment of hybridization arguments and in discussing globalization and culture problematizes the meaning of culture. This historically deep and geographically wide approach to globalization is essential reading as we face the increasing spread of conflicts bred by cultural misunderstanding The Crisis of Globalization Patrick Diamond, 2018-11-29 In recent years the effects of economic openness and technological change have fuelled dissatisfaction with established political systems and led to new forms of political populism that exploit the economic and political resentment created by globalization. This shift in politics was evident in the decision by UK voters to leave the European Union in June 2016 the November 2016 election of Donald Trump to the presidency of the United States as well as the rise of populist movements on left and right throughout much of Europe. To many voters the economy appears to be broken. Conventional politics is failing. Parties of the left and centre left have struggled to forge a convincing response to this new phase of globalization in the aftermath of the 2008 crisis. This book examines the challenges that the new era of globalization poses for progressive parties and movements across the world. It brings together leading thinkers and experts including Andrew Gamble Jeffry Frieden and Vivien Schmidt to debate the structural causes and political consequences of this new wave of globalization *Globalization in Crisis* Barry K.
