Smart Materials and New Technologies D. Michelle Addington, Daniel L. Schodek, 2005 Today architects are looking for new solutions to old problems including smart and intelligent materials that can be applied to building design This text covers the use of smart materials in a design perspective as well as describing how these solutions could be utilised in other applications *Smart Materials and Technologies in Architecture* Michelle Addington, Daniel Schodek, 2012-05-23 Today

architects and designers are beginning to look toward developments in new smart or intelligent materials and technologies for solutions to long standing problems in building design However these new materials have so far been applied in a diverse but largely idiosyncratic nature because relatively few architects have access to information about the types or properties of these new materials or technologies Two of the leading experts in this field Addington and Schodek have solved this problem by incorporating all the relevant information of all the latest technologies available to architects and designers in this one volume They present materials by describing their fundamental characteristics and go on to identify and suggest how these same characteristics can be exploited by professionals to achieve their design goals Here the wealth of technical understanding already available in the materials science and engineering literature is at last made accessible to a design audience
