The Social Contract Robert Ardrey, 1970 This title denies that men are created equal Jacket **Dr. Calhoun's Mousery** Lee Alan Dugatkin, 2024-10-03 A bizarre and compelling biography of a scientist and his work using rodent cities to question the potential catastrophes of human overpopulation It was the strangest of experiments What began as a utopian environment where mice had sumptuous accommodations had all the food and water they could want and were free from disease and predators turned into a mouse hell Science writer and animal behaviorist Lee Alan Dugatkin introduces readers to the peculiar work of rodent researcher John Bumpass Calhoun In this enthralling tale Dugatkin shows how an ecologist turned psychologist turned futurist became a science rock star embedded in the culture of the 1960s and 1970s As interest grew in his rodent cities Calhoun was courted by city planners and his work was reflected in everything from Tom Wolfe's hard hitting writing to the children's book Mrs Frisby and the Rats of NIMH He was invited to meetings with the Royal Society and the pope and taken seriously when he proposed a worldwide cybernetic brain a decade before others made the internet a reality Readers see how Calhoun's experiments rodent apartment complexes like Mouse Universe 25 led to his concept of behavioral sinks with real effects on public policy discussions Overpopulation in Calhoun's mouse and rat complexes led to the loss of sex drive the absence of maternal care and a class of automatons that included the beautiful ones who spent their time grooming themselves while shunning socialization Calhoun and those who followed his work saw the collapse of this mouse population as a harbinger of the ill effects of an overpopulated human world Drawing on previously unpublished archival research and interviews with Calhoun's family and former colleagues Dugatkin offers a riveting account of an intriguing scientific figure Considering Dr Calhoun's experiments he explores the changing nature of scientific research and delves into what the study of animal behavior can teach us about ourselves **A History of American Thought**

1860-2000 Daniel Wickberg, 2023-09-07 This book is a comprehensive overview of the history of modern American thought and examines a wide range of modern thought and thinkers from 1860 when Charles Darwin's Origin of Species was published in the United States to the end of the twentieth century The focus of this volume is on the destabilizing effects of modern challenges to notions of fixed order and absolute truths and the contradictory consequences for philosophical political social and aesthetic thought The intellectual response to the unprecedented changes of this era produced visions of both liberation from the hierarchies of the past and new forms of control and constraint One of the central contradictions in modern thought was between biological and cultural ideas of social psychological and moral order This is the first work to provide an interpretive vision of the entire period under consideration Topics covered include evolutionary thought philosophical Pragmatism ideas of race and gender pluralism and cultural relativism Cold War Liberalism science and religion feminist thought evolutionary psychology and the late twentieth century Culture Wars Thinkers from William James and Charlotte Perkins Gilman through Judith Butler and Cornel West are analyzed as historical figures This volume is an

Suprahumanism Daniel S. Forrest, 2014-08-09 We are at a crucial point in time a moment of transition as important as the emergence of Homo sapiens or the beginning of civilisation after the Neolithic Revolution Paradoxically the triumph of the West also called globalisation means the death of Europe and European man Our destiny hangs between two options either to complete the triumph of the egalitarian conception of the world which will bring about the end of history or to promote a historical regeneration Nietzsche prophesied that the Earth will eventually belong to either the last man or to the superman There are no other alternatives

Vegetarianism and Science Fiction Joshua Bulleid, 2023-10-06 Vegetarianism and Science Fiction A History of Utopian Animal Ethics examines how vegetarian ideals promoted within science fiction and utopian literature have had a real world impact on the awareness and spread of vegetarianism and animal advocacy as well as how the genres engagements have been altered to reflect changes in ethical and environmental philosophy Author Joshua Bulleid examines the representation of vegetarianism in the works of major science fiction authors including Mary Shelley H G Wells Arthur C Clarke Philip K Dick Ursula K Le Guin Ernest Callenbach Marge Piercy Octavia E Butler Kim Stanley Robinson and Margaret Atwood within their evolving social contexts tracing the development of vegetarian trends and their science fictional representations from the early nineteenth century to the present day

Biology, *Origins of Secret Societies* Richard Stevko, 2017-01-29 A speculative inquiry into the origins of Mankind s thinking about the unknown and steps taken to increase understanding of Life s mysteries

The Metaphysics of Liberty Frank Forman, 2012-12-06 Philosophy suffers from an excess of convoluted introspection One result is that concepts multiply unchecked That some events have observable causes gets reified into a First Cause or in a more secular age to the thesis that every event is fatalistically determined Another drawback of convoluted introspection is that tiny but crucial assumptions slip in often unawares with the result that densely argued counter tomes are written in reply and no progress is made toward any kind of consensus At bottom subjectivity reigns I exaggerate Toward the other pole of the subjectivity objectivity continuum consensus among scientists is in fact always at a good healthy distance from compulsive unanimity New theories replace old and at any one time the evidence can usually be interpreted two ways Indeed it is possible to pile epicycle upon epicycle in the Ptolemaic system of the heavens and approximate the ellipses planets travel in the Copernican system What cinched the case for Copernicus was not simplicity after all alchemy is simpler than chemistry Nor was it experiment there were no moon shots back then Rather it was Newton s foundations He established a physics for the earth and the heavens alike Earthly physics we can verify and it does not jell with the Ptolemaic system
