Social Goals And Social Organization Essays In Memory Of Elisha Pazner:

Social Goals and Social Organization Leonid Hurwicz, David Schmeidler, Hugo Sonnenschein, 1985-12-27 This book contains a collection of essays providing a comprehensive view of the design and evaluation of economic mechanisms

Multiagent Systems Gerhard Weiss, 1999 An introduction to multiagent systems and contemporary distributed artificial intelligence this text provides coverage of basic topics as well as closely related ones It emphasizes aspects of both theory and application and includes exercises of varying degrees of difficulty

Advances in Economic Theory: Volume 1 Econometric Society. World Congress, 1992 This book gives the reader a unique survey of advances in economic theory

The State of Economics, the State of the World Kaushik Basu, David Rosenblatt, Claudia Sepulveda, 2025-02-04 Leading economists address the ongoing challenges to economics in theory and practice in a time of political and economic crises More than a decade of financial crises sovereign debt problems political conflict and rising xenophobia and protectionism has left the global economy unsettled and the ability of economics as a discipline to account for episodes of volatility uncertain In this book leading economists consider the state of their discipline in a world of ongoing economic and political crises The book begins with three sweeping essays by Nobel laureates Kenneth Arrow in one of his last published works Amartya Sen and Joseph Stiglitz that offer a summary of the theoretical foundations of modern economics the twin pillars of general equilibrium theory and welfare economics Contributors then turn to macroeconomic stabilization and growth and finally new areas of research that depart from traditional theory methodology and concerns climate change behavioral economics and evolutionary game theory The 2019 Nobel Prize laureates Abhijit Banerjee Esther Duflo and Michael Kremer contribute a paper on the use of randomized control trials in development economics

Fairness Nicholas Rescher, 2018-02-06 In theory and practice the notion of fairness is far from simple The principle is often elusive and subject to confusion even in institutions of law usage and custom In Fairness Nicholas Rescher aims to liberate this concept from misunderstandings by showing how its definitive characteristics prevent it from being absorbed by such related conceptions as paternalistic benevolence radical egalitarianism and social harmonization Rescher demonstrates that equality before the state is an instrument of justice not of social utility or public welfare and argues that the notion of fairness stops well short of a literal egalitarianism Rescher disposes of the confusions arising from economists' penchant to focus on individual preferences from decision theorists' concern for averting envy and from political theorists' sympathy for egalitarianism In their place he shows how the idea of distributive equity forms the core of the concept of fairness in matters of distributive justice The coordination of shares with valid claims is the crux of the concept of fairness In Rescher's view this means that the pursuit of fairness requires objective rather than subjective evaluation of the goods being shared This is something quite different from subjective equity based on the personal evaluation of goods by those laying claim to them Insofar as subjective equity is a concern the appropriate procedure for its realization is a process of maximum value distribution Further Rescher

demonstrates that in matters of distributive justice the distinction between new ownership and preexisting ownership is pivotal and calls for proceeding on very different principles depending on the case How one should proceed depends on context and what is adjudged fair is pragmatic in that there are different requirements for effectiveness in achieving the aims and purposes of the sort of distribution that is intended Rescher concludes that fairness is a fundamentally ethical concept Its distinctive *modus operandi* contrasts sharply with the aims of paternalism preference maximizing or economic advantage Fairness will be of interest to philosophers economists and political scientists **Mathematical Topics on**

Representations of Ordered Structures and Utility Theory Gianni Bosi, María J. Campión, Juan C. Candeal, Esteban Indurain, 2020-01-23 This book offers an essential review of central theories current research and applications in the field of numerical representations of ordered structures It is intended as a tribute to Professor Ghanshyam B Mehta one of the leading specialists on the numerical representability of ordered structures and covers related applications to utility theory mathematical economics social choice theory and decision making Taken together the carefully selected contributions provide readers with an authoritative review of this research field as well as the knowledge they need to apply the theories and methods in their own work *Lectures on Inequality, Poverty and Welfare* Antonio Villar, 2016-12-24 These lectures aim to help readers understand the logics and nature of the main indicators of inequality and poverty with special attention to their social welfare underpinnings The key approach consists in linking inequality and poverty measurement with welfare evaluation As concern for inequality and poverty stems from ethical considerations the measurement of those aspects necessarily involves some value judgments Those value judgments can be linked directly or indirectly to welfare assessments on the distribution of personal and social opportunities Inequality and poverty are thus considered to be partial aspects of the welfare evaluation of the opportunities in a given society The volume includes two applications that illustrate how the models can be implemented They refer to inequality of opportunity and poverty in education using PISA data Social Welfare Evaluation and Intergenerational Equity Kohei Kamaga, 2020-05-19 This book presents a synthesis of recent developments in axiomatic analyses of social welfare evaluation in social choice theory It covers three different contexts of social welfare evaluation namely social welfare evaluation within a generation intergenerational social welfare evaluation involving infinitely many generations and intergenerational social welfare evaluation with variable population sizes of generations Analyzing these three different but related contexts of social welfare evaluation in a unified manner the book places the emphasis on the close linkage between them and provides readers with new insight regarding the relationship between them Evaluation criteria discussed in the book are firmly rooted in moral philosophy Besides the axiomatic analyses of utilitarian and egalitarian evaluation criteria newly developed results on compromised criteria between the utilitarian and egalitarian evaluation criteria are covered as well The book is recommended to readers who seek an up to date integrated overview of a large and broad body of the literature on the axiomatic analysis of social welfare evaluation **Superfairness** William J.

Baumol, Dietrich Fischer, 1986 With his characteristic acuteness and lucidity William Baumol one of America's foremost economists tackles the problem of equity considerations in welfare economics by applying the novel superfairness criterion to the distribution of resources product income and wealth that arises from economic decisions Nobel Lectures In Economic Sciences (2006-2010) Bertil Holmlund, 2014-11-28 In 1968 Sveriges Riksbank Sweden's central bank established the Prize in Economic Sciences in Memory of Alfred Nobel founder of the Nobel Prize The Prize in Economic Sciences is awarded by the Royal Swedish Academy of Sciences Stockholm according to the same principles as for the Nobel Prizes that have been awarded since 1901 This volume is a collection of the Nobel lectures delivered by the prizewinners together with their biographies and the presentation speeches for the period 2006-2010 List of prizewinners and their award citations 2006 Edmund S Phelps for his analysis of intertemporal tradeoffs in macroeconomic policy 2007 Leonid Hurwicz Eric S Maskin and Roger B Myerson for having laid the foundations of mechanism design theory 2008 Paul Krugman for his analysis of trade patterns and location of economic activity 2009 Elinor Ostrom for her analysis of economic governance especially the commons and Oliver E Williamson for his analysis of economic governance especially the boundaries of the firm 2010 Peter A Diamond Dale T Mortensen and Christopher A Pissarides for their analysis of markets with search frictions
