the place and ways they carry and deliver their babies As nations such as Canada became colonized traditional gender roles were seen as an impediment The forced rearrangement of these gender roles was highly disruptive to family structures Indigenous women quickly lost their social and legal status as being dependent on fathers and then husbands The traditional structures of communities became replaced with colonially informed governance which reinforced patriarchy and paternalism The authors in this book carefully consider these historic interactions and their impacts on Indigenous women s experiences As the first section of the book describes pregnancy is a time when women reflect on their bodies as a space for the development of life Foods prepared and consumed ceremony and other activities engaged in are no longer a focus solely for the mother but also for the child she is carrying Authors from a variety of places and perspectives thoughtfully express the historical along with contemporary forces positively and negatively impacting prenatal behaviours and traditional practices Place and culture in relation to birth are explored in the second half of the book from locations in Canada such as Manitoba Ontario British Columbia the Northwest Territories and Aotearoa The reclaiming and revitalization of birthing practices along with rejuvenating forms of traditional knowledge form the foundation for exploration into these experiences from a political perspective It is an important part of decolonization to acknowledge policies such as birth evacuation as being grounded in systemic racism The act of returning birth to communities and revitalizing Indigenous prenatal practices are affirmation of sustained resilience and strength instead of a one sided process of reconciliation
