Social Militarisation And The Power Of History A Study Of Scholarly Perspectives:

Social Militarisation and the Power of History Dick Harrison, 1999 This book examines the scholarly treatment of three macro regions East Asia Southeast Asia and Mesoamerica The early medieval history of Europe is also analysed from the point of view of militarisation

Rethinking Military History Jeremy Black, 2004 Rethinking Military History is a bold new thought book that reconsiders military history at the beginning of the twenty first century The chapters provide a valuable and concise survey of the main themes in the study of military history from 1500 to the present day as Jeremy Black reveals the main trends in the practice and approach to military history and proposes a new manifesto for the subject to move forward This must read study demonstrates the limitations of current approaches including common generalizations omissions and over simplifications Engaging theoretical discussions with reference to specific conflicts suggest how these limitations can be remedied and adapted whilst incorporating contributions from other disciplines Rethinking Military History is essential reading for all those with an interest in military history and all who wish to take part in moving the discipline forward

A Cumulative Bibliography of Medieval Military History and Technology Kelly DeVries, 2001-11-01 There is perhaps no other more lively area for study in medieval history than medieval military history with its attendant and complementary field the history of medieval military technology In the past twenty years it seems that more major scholarly inroads have been made in this field than in any other historical genre of medieval studies or chronological period of military history What this has meant is that it is now more difficult to keep up with all of the trends and sources in the field than ever before Hence the need for a reference work which covers what has previously been written and which in turn can assist the scholar both the more experienced academic and the beginner to improve his or her work in medieval military history or the history of medieval military technology Utilizing library catalogues bibliographies and footnotes this bibliography has compiled the most complete list of secondary references to works in medieval military history and the history of military technology It keeps fairly strictly to a geography which centers on conventional medieval boundaries Europe Byzantium and the Middle East However the chronology does differ from the conventional medieval dates Because of its influence on the early Middle Ages references to Late Antiquity especially to the military history and technology of the third and fourth century Roman Empire have been included For the opposite reason the influence of the Middle Ages on the sixteenth and early seventeenth centuries references to military history and technology up to 1648 have been included as well This is especially important in the study of the Ottoman Turkish Wars and Arms and Armor where the end of the fifteenth century as a chronological terminus makes little sense

War and the Cultural Turn Jeremy Black, 2013-05-08 In this stimulating new text renowned military historian Jeremy Black unpacks the concept of culture as a descriptive and analytical approach to the history of warfare Black takes the reader through the limits and prospects of culture as a tool for analyzing war while also demonstrating the necessity of maintaining the context of alternative analytical matrices such as technology Black sets

out his unique approach to culture and warfare without making his paradigm into a straightjacket He goes on to demonstrate the flexibility of his argument through a series of case studies which include the contexts of rationale Gloire strategy early modern Britain organizations the modern West and ideologies the Cold War These case studies drive home the point at the core of the book culture is not a bumper sticker it is a survival mechanism Culture is not immutable it is adaptable Wide ranging international and always provocative War and the Cultural Turn will be required reading for all students of military history and security studies

A Cumulative Bibliography of Medieval Military History and Technology, Update 2004 Kelly DeVries, 2004-12-01 This is the first update of A Cumulative Bibliography of Medieval Military History and Technology which appeared in 2002 It is meant to do two things to present references to works on medieval military history and technology not included in the first volume and to present references to all books and articles published on medieval military history and technology from 2000 to 2002 These references are divided into the same categories as in the first volume and cover a chronological period of the same length from late antiquity to 1648 again in order to present a more complete picture of influences on and from the Middle Ages It also continues to cover the same geographical area as the first volume in essence Europe and the Middle East or again influences on and from this area The languages of these bibliographical references reflect this geography

War in the World Jeremy Black, 2017-09-16 War was a central theme in the world history of the late fifteenth and sixteenth centuries with military capability and activity central to its states societies economies and cultures War in the World 1450 1600 provides an account of warfare in the period placing it in global context It offers a corrective to a narrative that has emphasised European developments and obscured the history of non European military systems and cultures of war Highlighting conflict between non Western powers which constituted most of the conflict around the world as well as giving due attention to warfare between Western and non Western powers Black emphasises the breadth and variety of military trajectories and connections This comparative context also provides a framework for considering the idea of a European based Military Revolution A wide ranging account of world military history in a period of substantial development the book will be essential reading for those interested in global history and conflict War in the World 1450 1600 is designed as a companion volume to Jeremy Black's Beyond the Military Revolution Warfare in the Seventeenth Century World

Decolonizing the Viking Age Fredrik Svanberg, 2003 This volume argues that the Scandinavian Viking Age can be seen as a system of knowledge constructed in the late 19th century and in its basic structures maintained up to the present day This system of knowledge was heavily influenced by the nationalists

War Jeremy Black, 2000 This global analysis of the social effects of war offers a far reaching assessment of military history challenging the focus on technology and military revolution War is placed in context from the evolution of specialized troops in the earliest civilizations to likely future scenarios
