Rethinking Comparison Erica S. Simmons, Nicholas Rush Smith, 2021-10-07 Qualitative comparative methods and specifically controlled qualitative comparisons are central to the study of politics They are not the only kind of comparison though that can help us better understand political processes and outcomes Yet there are few guides for how to conduct non controlled comparative research This volume brings together chapters from more than a dozen leading methods scholars from across the discipline of political science including positivist and interpretivist scholars qualitative methodologists mixed methods researchers ethnographers historians and statisticians Their work revolutionizes qualitative research design by diversifying the repertoire of comparative methods available to students of politics offering readers clear suggestions for what kinds of comparisons might be possible why they are useful and how to execute them By systematically thinking through how we engage in qualitative comparisons and the kinds of insights those comparisons produce these collected essays create new possibilities to advance what we know about politics

The Oxford Handbook of Political Methodology Janet M. Box-Steffensmeier, Henry E. Brady, David Collier, 2008-08-21 Political methodology has changed dramatically over the past thirty years and many new methods and techniques have been developed Both the Political Methodology Society and the Qualitative Multi Methods Section of the American Political Science Association have engaged in ongoing research and training programs that have advanced quantitative and qualitative methodology The Oxford Handbook of Political Methodology presents and synthesizes these developments The Handbook provides comprehensive overviews of diverse methodological approaches with an emphasis on three major themes First specific methodological tools should be at the service of improved conceptualization comprehension of meaning measurement and data collection They should increase analysts leverage in reasoning about causal relationships and evaluating them empirically by contributing to powerful research designs Second the authors explore the many different ways of addressing these tasks through case studies and large n designs with both quantitative and qualitative data and via techniques ranging from statistical modelling to process tracing Finally techniques can cut across traditional methodological boundaries and can be useful for many different kinds of researchers Many of the authors thus explore how their methods can inform and be used by scholars engaged in diverse branches of methodology
