Right Wing Social Revolution and Its Discontent: the Dynamics of Genocide Leslie

Herzberger, 2006-12-21 The history of the United States in the last thirty years its preoccupation with the Vietnam War and the devastating affects of that war on the psyche of this nation is evidence of a foreign policy tragedy Foreign policy tragedy brings domestic tragedy in its wake The purpose of this study is to work out why the approaches to social revolution and that is what the Vietnam War was about have been wrong on both sides of the ideological spectrum the last thirty years in the U S point out why they were wrong point to where they were wrong and point to the consequences of acting in a society when the perceptions are in certain respects wrong Let me sum up my perception on what went wrong in Vietnam It was a Right wing war fought on Left wing premises It was a war that could not have been won because those who designed it would not or could not win it but were also afraid of losing it It was a war that was wrongly perceived by both sides of the ideological spectrum The Liberal argument was that America tried everything and still lost it The Conservative argument was that it could have been won if the opposition had not tied their hands keeping them from an all out effort that would have been required to win it The war was started in earnest by the Liberals under Kennedy The strategy was to roll up the enemy by hitting on the peasant and through it cut off the leaders Pacification education re education indoctrination and the introduction of self defense techniques to the South Vietnamese peasants was meant to stop the revolution exported from the North in its tracks The U S policy was predicated on the assumption that the peasants really had something to do with the ruling functions of the North Vietnamese revolution after Thermidor that after the onset of Thermidor after the institutionalization of the revolution in Hanoi the revolution was still revolution The Liberal approach has believed that revolution is tantamount to Maos view of it in China peasants all immersed in the revolutionary process as fish in the sea And so you would have to drain the very ocean itself to stop it Our approach to the post revolutionary process is that after the onset of Thermidor in a society revolution is a bunch of terror informed super bureaucrats at the center of a society increasingly cut off from the periphery In a post revolutionary society it is the leaders that matter not the fish in the sea So bombing the small fish into fish soup hell in response as did the West in Vietnam in that war every tree every outhouse every shack and every village until they drop so much ordinance that the entire region is brain dead from defoliants and pockmarks and natural calamities while leaving the center untouched would seem insane Yet that was the policy in Vietnam of America And then nothing happened Nothing happened week after week year after year except that America itself was being driven mad doing the same thing and expecting it to come out different That as the President elect said in 1993 was and is insanity But what choice did they all have The pro war liberal American leadership that designed the war in Vietnam did not dare bomb Hanoi the capitol of North Vietnam for fear of triggering World War III with Red China and with Soviet Russia both of

whose client North Vietnam was So they tied their own hands figuring that by coming through the back door fish in the sea style piece by piece nobody will notice in China and Russia ergo no World War III So they took a strategy that was insane and made a virtue out of its necessity They tied their own hand And then they blamed the opposition for forcing them to fight with their hands tied behind their backs On the other hand States, Ideologies, and Social Revolutions Misagh Parsa, 2000-08-17 Between 1979 and 1986 Iran Nicaragua and the Philippines underwent dramatic political and social revolutions This book examines the conditions and processes that gave rise to revolutions and their outcomes through an in depth analysis of economic and political developments in these countries The book studies the background to revolution provided by state formation and development economic intervention the states vulnerabilities and the social consequences of their development policies Extensive primary data is used to analyze the impact of the collective actions and ideologies of the major social groups involved students clergy workers and capitalists and how they affected the potential for a successful revolutionary outcome Parsa challenges prevailing theories of social revolution and develops an alternative model that incorporates variables from a wide variety of perspectives His book provides a valuable framework within which to understand the causes of revolutions their mechanics and development and their outcomes *The Theory of Social Revolutions* Brooks Adams, 2019-12-04 In *The Theory of Social Revolutions* Brooks Adams explores the intricate dynamics of societal upheaval through a historical lens asserting that revolutions are not merely sporadic events but are instead manifestations of deeper structural tensions within a civilization With a compelling style that marries rigorous empirical analysis with philosophical insights Adams immerses the reader in a rich tapestry of history examining the interplay between economic forces and social change across civilizations His examination extends to several pivotal revolutions offering a coherent theoretical framework that situates these events within the broader trajectory of human development and societal evolution Brooks Adams hailing from a prominent American family and influenced by the intellectual currents of his time was deeply concerned with the implications of industrialization and modernity on societal structures His background in law and economics combined with his familial legacy of historical inquiry equipped him with the tools to engage in such a profound exploration of social phenomena This work reflects Adams's belief in the cyclical nature of history and the recurring patterns of societal development shaped by economic factors *The Theory of Social Revolutions* is essential reading for those interested in understanding the underlying forces of social change Its multifaceted approach not only provides a theoretical basis for the study of revolutions but also offers timeless insights into the socio economic struggles that continue to resonate today This pivotal text is a must read for scholars students and anyone fascinated by the complexities of societal transformation

building and the outcomes of revolutions case studies of great revolutions and much more Revolution and History Arif Dirlik, 1989-09-18 A fascinating contribution to Marxist historiography and to the history of Marxist historiography Dirlik's story of the reemergence of the modes of production debate in the early years of the Chinese revolution has much to tell us about that debate itself and not least about its intimate relationship to political practice and revolutionary strategy Fredric Jameson Duke University *Social Revolutions in the Modern World* Theda Skocpol, 1994-09-30 Theda Skocpol author of the award winning 1979 book *States and Social Revolutions* updates her arguments about social revolutions *Dawn of the International Socialist Revolution* Stefan Engel, 2016-03-03 By unleashing the international productive forces the reorganization of international production has ushered in the G tterd mmerung of international finance capital At the beginning of its crusade around the globe international finance capital still reveled in fantasies of omnipotence and dreams of eternity Today their mood is one of general hangover the crisis proneness of the social system proves irreversible But the turn of a new era already looms on the horizon the dawning of the international socialist revolution becomes visible And yet the old masters will not make way voluntarily even if they drag the whole of humanity with them into capitalist barbarism The decision for the international revolution must be made by the workers and the masses themselves To help them make this decision and together with them sweep every obstacle out of the way so that they can fulfill their historical mission that in a nutshell sums up the tasks of the Marxist Leninists in the whole world today Radicalism and Cultural Dislocation in Ethiopia, 1960-1974 Messay Kebede, 2008 A provocative investigation into the root causes of the Ethiopian political upheavals in the second half of the twentieth century During the 1960s and early 1970s a majority of Ethiopian students and intellectuals adopted a Marxist Leninist ideology with fanatic fervor The leading force in an uprising against the imperial regime of Emperor Haile Selassie they played a decisive role in the rise of a Leninist military regime In this original study Messay Kebede examines the sociopolitical and cultural factors that contributed to the radicalization of the educated elite in Ethiopia and how this phenomenon contributed to the country's uninterrupted political crises and economic setbacks since the Revolution of 1974 Offering a unique insider's perspective garnered from his direct participation in the student movement the author emphasizes the role of the Western education system in the progressive radicalization of students and assesses the impact of Western education on traditional cultures The most comprehensive study of the role of students in modern Ethiopian political history to date *Radicalism and Cultural Dislocation in Ethiopia 1960-1974* opens the door for discussion and debate on the issue of African modernization and the effects of cultural colonization Messay Kebede is Professor in the Department of Philosophy at the University of Dayton and is author of *Survival and Modernization Ethiopia's Enigmatic Present A Philosophical Discourse* 1999
