Valentina Emilia Balas, Lakhmi C. Jain, Branko Kovačević, 2015-11-02 These volumes constitute the Proceedings of the 6th International Workshop on Soft Computing Applications or SOFA 2014 held on 24-26 July 2014 in Timisoara Romania. This edition was organized by the University of Belgrade Serbia in conjunction with Romanian Society of Control Engineering and Technical Informatics SRAIT Arad Section, The General Association of Engineers in Romania Arad Section, Institute of Computer Science Iasi Branch of the Romanian Academy and IEEE Romanian Section. The Soft Computing concept was introduced by Lotfi Zadeh in 1991 and serves to highlight the emergence of computing methodologies in which the accent is on exploiting the tolerance for imprecision and uncertainty to achieve tractability, robustness and low solution cost. Soft computing facilitates the use of fuzzy logic, neurocomputing, evolutionary computing and probabilistic computing in combination leading to the concept of hybrid intelligent systems. The combination of such intelligent systems tools and a large number of applications introduce a need for a synergy of scientific and technological disciplines in order to show the great potential of Soft Computing in all domains. The conference papers included in these proceedings published post-conference were grouped into the following areas of research: Image, Text and Signal Processing; Intelligent Transportation Modeling and Applications; Biomedical Applications; Neural Network and Applications; Knowledge Based Technologies for Web Applications; Cloud Computing; Security Algorithms and Computer Networks; Knowledge Based Technologies; Soft Computing Techniques for Time Series Analysis; Soft Computing and Fuzzy Logic in Biometrics; Fuzzy Applications Theory and Fuzzy Control; Business Process Management Methods and Applications in Electrical Engineering. The volumes provide useful information to professors, researchers and graduated students in the area of soft computing techniques and applications as they report new research work on challenging issues. Soft Computing Applications in Optimization, Control, and Recognition Patricia Melin, Oscar Castillo, 2012-12-14 Soft computing includes several intelligent computing paradigms like fuzzy logic, neural networks and bio-inspired optimization algorithms. This book describes the application of soft computing techniques to intelligent control, pattern recognition and optimization problems. The book is organized in four main parts. The first part deals with nature-inspired optimization methods and their applications. Papers included in this part propose new models for achieving intelligent optimization in different application areas. The second part discusses hybrid intelligent systems for achieving control. Papers included in this part make use of nature-inspired techniques like evolutionary algorithms, fuzzy logic and neural networks for the optimal design of intelligent controllers for different kinds of applications. Papers in the third part focus on intelligent techniques for pattern recognition and propose new methods to solve complex pattern recognition problems. The fourth part discusses new theoretical concepts and methods for the application of soft computing to many different areas such as natural language processing, clustering and optimization. Soft Computing in Information Retrieval Fabio Crestani, Gabriella Pasi, 2013-03-19 Information retrieval (IR) aims at defining systems able to provide a fast and effective content-based access to a large amount of stored information. The aim of an IR system is to

estimate the relevance of documents to users information needs expressed by means of a query This is a very difficult and complex task since it is pervaded with imprecision and uncertainty Most of the existing IR systems offer a very simple model of IR which privileges efficiency at the expense of effectiveness A promising direction to increase the effectiveness of IR is to model the concept of partially intrinsic in the IR process and to make the systems adaptive i e able to learn the user s concept of relevance To this aim the application of soft computing techniques can be of help to obtain greater flexibility in IR systems

Soft Computing Systems Ajith Abraham, Javier Ruiz-del-Solar, Mario Köppen, 2002 Annotation Intelligent Systems cover a broad area of knowledge based systems computational intelligence soft computing and their hybrid combinations Research and development in intelligent systems have enabled us to not only solve a range of problems which were previously considered too difficult but also have enabled a larger number of other problems to be tackled more effectively This volume focuses on the recent research developments on intelligent systems in a hybrid environment and its applications in image processing internet modelling and data mining The different contributions presented in this volume were accepted for the Second International Conference on Hybrid Intelligent Systems HIS 02
