Software Engineering in the Era of Cloud Computing Muthu Ramachandran, Zaigham Mahmood, 2020-01-01 This

book focuses on the development and implementation of cloud based complex software that allows parallelism fast

processing and real time connectivity Software engineering SE is the design development testing and implementation of

software applications and this discipline is as well developed as the practice is well established whereas the Cloud Software

Engineering CSE is the design development testing and continuous delivery of service oriented software systems and

applications Software as a Service Paradigm However with the emergence of the highly attractive cloud computing CC

paradigm the tools and techniques for SE are changing CC provides the latest software development environments and the

necessary platforms relatively easily and inexpensively It also allows the provision of software applications equally easily and

on a pay as you go basis Business requirements for the use of software are also changing and there is a need for applications

in big data analytics parallel computing AI natural language processing and biometrics etc These require huge amounts of

computing power and sophisticated data management mechanisms as well as device connectivity for Internet of Things IoT

environments In terms of hardware software communication and storage CC is highly attractive for developing complex

software that is rapidly becoming essential for all sectors of life including commerce health education and transportation The

book fills a gap in the SE literature by providing scientific contributions from researchers and practitioners focusing on

frameworks methodologies applications benefits and inherent challenges barriers to engineering software using the CC

paradigm
