Goal Oriented Learning Environments Horace Moo-Young, Timothy Fortner, 2003 E learning encompasses many things to many people Elliot Massie a leading e learning guru states that Online learning is not about taking a course and putting it on desktop It encompasses Combination of learning services and technology to provide high value integrated learning anytime and anyplace GOLE aims to create a virtual learning simulator that is capable of customizing the pedagogy to the learners learning style To properly design learn by doing scenarios the learning environment must balance the learning objectives with authenticity The key is to build a realistic environment which is complex enough to promote expectation failure and robust enough to support the learner at that point Two of the major learning objectives for a goal oriented learning environment are the application of facts and building specific skills The purpose of this research was to design develop implement and assess a Goal Oriented Learning Environment GOLE into the Civil and Environmental Engineering curriculum

at Lehigh University Also to design develop implement and assess Internet based instructional systems into the CEE curriculum To achieve these objectives a GOLE was implemented into two courses that were used as case studies in this research These case studies describe the instructional design method utilized and the assessment involved to evaluate the courses The instructional design method utilized nine steps Discuss Determine Decide Design Develop Implement Assessment Evaluation and Evolve The designing of GOLE focused on content delivery platform character development and story line In order to assess and evaluate the GOLE a series of five evaluations were created in order perform the analysis skill matrix course performance website evaluations and the DISC profile The data was then analyzed to determine what parts of the course were effective

Laboratory Manual for Geotechnical Characterization of Fine-Grained Soils

Alan J. Lutenecker, 2023-06-20 This manual presents procedures for performing advanced laboratory tests on fine grained soils It covers characterization tests which determine soil composition and quantify the individual components of a soil and behavioral tests such as the Atterberg Limits tests that demonstrate how the fines fraction of a soil reacts when mixed with water and the Linear Shrinkage Test that demonstrates how much a soil shrinks The material goes beyond traditional evaluation of basic soil behavior by presenting more advanced laboratory tests to characterize soil in more detail These tests provide detailed compositional characteristics which identify subtle changes in conditions and vertical variations in the soil and which help to explain unusual behavior A unique compilation of information on key soil tests Combines characterization tests with behavior tests The book suits graduate students in geotechnical engineering as well as practitioners and researchers

Geotechnical Laboratory Measurements for Engineers John T. Germaine, Amy V. Germaine, 2009-06-02

A comprehensive guide to the most useful geotechnical laboratory measurements Cost effective high quality testing of geo materials is possible if you understand the important factors and work with nature wisely Geotechnical Laboratory Measurements for Engineers guides geotechnical engineers and students in conducting efficient testing without sacrificing the quality of results Useful as both a lab manual for students and as a reference for the practicing geotechnical engineer the book covers thirty of the most common soil tests referencing the ASTM standard procedures while helping readers understand what the test is analyzing and how to interpret the results Features include Explanations of both the underlying theory of the tests and the standard testing procedures The most commonly taught laboratory testing methods plus additional advanced tests Unique discussions of electronic transducers and computer controlled tests not commonly covered in similar texts A support website at www.wiley.com/college/germaine with blank data sheets you can use in recording the results of your tests as well as Microsoft Excel spreadsheets containing raw data sets supporting the experiments
