Slaymaker, 2011-11-01 This book advances a typology of experimentation in the field science of geomorphology the study of the form of the earth s surface and the evolution of its relief This typology is then applied to problems of total drainage basin change and subsets of processes of change associated with slopes and channels Geomorphology has traditionally been a descriptive discipline concerned with the evolution of landscapes over very long time periods However since the 1950s there

has been a strong trend towards the study of contemporary processes of change and the influence of society as well as of natural biophysical factors. Consequently an experimental approach is becoming more appropriate. Commissioned by the International Geographical Union, this work is the first to document different field methodologies in geomorphology. The contributors are internationally known geomorphologists from Canada, the United States, the United Kingdom, and Japan. They review methods, global coverage, and advances in understanding while at the same time promoting a more dynamic, more relevant, and more applied science of earth surface change, the geomorphological aspects of global change.

River Basin Management Daniel Bucur, 2016-08-10 Many of the challenges facing farmers and human communities from hydrographical basins are not new. But due to the fact that the nature and extents of the problems vary from one region to another and from one basin to another, the responses are highly diversified. There is no generally valid solution for all the problems. However, in addressing issues on ensuring the prevention or mitigation of the destructive consequences of flood damage or prolonged drought, as for the optimal use of water by consumers, sustainable basin land use, biodiversity conservation, and environment protection, as well, fourteen specialists and their colleagues present the state of the art in these important matters and new possible solutions to solve identified problems from the scientific investigations undertaken.

Advances in Remote Sensing Technology and the Three Poles Manish Pandey, Prem C. Pandey, Yogesh Ray, Aman Arora, Shridhar D. Jawak, Uma K. Shukla, 2022-12-12 ADVANCES IN REMOTE SENSING TECHNOLOGY AND THE THREE POLES Covers recent advances in remote sensing technology applied to the Three Poles, a concept encompassing the Arctic, Antarctica, and the Himalayas. Advances in Remote Sensing Technology and the Three Poles is a multidisciplinary approach studying the lithosphere, hydrosphere, encompassing both limnosphere and oceanosphere, atmosphere, biosphere, and anthroposphere of the Arctic, the Antarctic, and the Himalayas. The drastic effects of climate change on polar environments bring to the fore the often subtle links between climate change and processes in the hydrosphere, biosphere, and lithosphere, while unanswered questions of the polar regions will help plan and formulate future research projects. Sample topics covered in the work include Terrestrial net primary production of the Arctic and modeling of Arctic landform evolution, Glaciers and glacial environments including a geological, geophysical, and geospatial survey of Himalayan glaciers, Sea ice dynamics in the Antarctic region under a changing climate, the Quaternary geology and geomorphology of Antarctica, Continuous satellite missions, data availability, and the nature of future satellite missions including scientific data sharing policies in different countries, Software tools, models, and remote sensing technology for investigating polar and other environments. For postgraduates and researchers working in remote sensing, photogrammetry, and landscape evolution modeling, Advances in Remote Sensing Technology and the Three Poles is a crucial resource for understanding current technological capabilities in the field, along with the latest scientific research that has been conducted in polar areas.

Slope Stabilization and Erosion Control: A Bioengineering Approach Roy P.C. Morgan, R.J. Rickson, 2003-09-02 This book is an up to date review of research and

practice on the use of vegetation for slope stabilization and control of surface erosion caused by water and wind From a basic understanding of the principles and practices of vegetation growth and establishment it describes how vegetation can be treated as an engineering material and used to solve erosion and slope stability problems **Land Degradation** A.J.

Conacher,2013-12-11 This book contains selected contributions from the Sixth Meeting of the International Geographical Union s Commission on Land Degradation and Desertification held in Perth Australia in September 1999 Collectively these contributions explicitly seek to understand not only the mechanisms responsible for the problem of land degradation but their social and economic implications the means of overcoming the problems and the policy instruments whereby remedial measures may be implemented This breadth of approach is both distinctive and essential if the problems are to be tackled effectively The authorship comprises of specialists mostly geographers from universities research organizations and government agencies who provide a truly international perspective with contributions from Iceland to Australia and from the USA to Japan Audience The book presents current research findings which will be of particular benefit to professionals and practitioners as well as researchers and tertiary level educationalists who are involved with land degradation Integrated

Kidd,David Pimental,2012-12-02 Written to help bring agriculture s Green Revolution to the third world Integrated Resource Management includes overviews of current agricultural production systems and their alternatives demographics on mortality and population growth soils erosion water availability sustainable integrated agroforestry systems and behavioral adaptations Explains why a quality environment is essential for future agricultural and economic developmentDemonstrates that integrated resource management leads to sustainable and productive agriculture for development Shows that certain agroforestry techniques conserve soil water energy and biological resources and at the same time increase food and fuel supplies Addresses the need for interdisciplinary and multidisciplinary research and training to implement sound resource management policies and programs **Weathering and Erosion Processes in the**

Natural Environment Virendra Bahadur Singh,Sughosh Madhav,Naresh Chandra Pant,Ravi Shekhar,2023-12-22

Weathering and Erosion Processes in the Natural Environment An indispensable introduction to the key environmental processes of weathering and erosion Natural and human induced weathering processes can have a great impact on soil and groundwater quality With climate change and other environmental challenges placing increased emphasis on these resources it has never been more important for researchers and environmental professionals to attain detailed knowledge of weathering and erosion processes Weathering and Erosion Processes in the Natural Environment meets this need with a rigorous systematic overview Beginning with a description of different forces and processes that contribute to weathering it then discusses the different kinds of landforms that can be produced by weathering and erosion processes as well as the potential impacts of hydrogeological processes on both surface water and groundwater The result is a volume that balances qualitative and quantitative understanding of this crucial subject Weathering and Erosion Processes in the Natural

Environment readers will also find Documented examples in which weathering and erosion processes have led to heavy metals and other trace elements in groundwater Detailed discussion of climate change impacts including extreme weather events and rising carbon dioxide levels Modeling approaches throughout to enable quantitative assessment and predictions of future impact Weathering and Erosion Processes in the Natural Environment is ideal for researchers and advanced students in geology geochemistry hydrogeochemistry and environmental science as well as professionals dealing with water and soil management

Desertification Monique Mainguet, 2012-12-06 After UNCED United Conference on Environment and Development Rio de Janeiro July 1992 a second edition of Desertification was necessary About 150 corrections amendments and additions take scientific progress into account The author also presents an updated chapter in which the results of UNCED are analyzed This book aims at an understanding of what is commonly called desertification a term which is proposed to be replaced by land degradation Each level of technology excessive or insufficient creates its own mismanagement This is reflected in an increase in land degradation and eventually a decrease in soil productivity The benefit to the reader is an awareness of the ecozones and a global overview of the phenomena mechanisms and existing solutions

Innovations as Key to the Green Revolution in Africa Andre Bationo, Boaz Waswa, Jeremiah M. Okeyo, Fredah Maina, Job Maguta Kihara, 2011-08-30 Africa can achieve self sufficiency in food production through adoption of innovations in the agriculture sector Numerous soil fertility and crop production technologies have been generated through research however wide adoption has been low African farmers need better technologies more sustainable practices and fertilizers to improve and sustain their crop productivity and to prevent further degradation of agricultural lands The agricultural sector also needs to be supported by functional institutions and policies that will be able to respond to emerging challenges of globalization and climate change

Managing Weather and Climate Risks in Agriculture Mannava VK Sivakumar, Raymond P. Motha, 2008-01-10 In many parts of the world weather and climate are one of the biggest production risks and uncertainty factors impacting on agricultural systems performance and management Both structural and non structural measures can be used to reduce the impacts of the variability including extremes of climate resources on crop production While the structural measures include strategies such as irrigation water harvesting windbreaks etc the non structural measures include use of seasonal to interannual climate forecasts improved application of medium range weather forecasts and crop insurance This book based on an International Workshop held in New Delhi India should be of interest to all organizations and agencies interested in improved risk management in agriculture
