Materials and Civil Engineering Jimmy C.M. Kao, Wen-Pei Sung, Ran Chen, 2014-10-21 This book contains select green building materials and civil engineering papers from the 4th International Conference on Green Building Materials and Civil Engineering GBMCE which was held in Hong Kong August 21-22, 2014. This volume of proceedings aims to provide a platform for researchers, engineers, academics, and industry professionals. Sustainable Buildings and Structures Jun Xia, 2015-10-07 Sustainable Buildings and Structures collects the contributions presented at the 1st International Conference on Sustainable Buildings and Structures Suzhou, China, 29 October-1 November 2016. The book aims to share thoughts and ideas on sustainable approaches to urban planning, engineering, design, and construction. The topics discussed include Architectural Integration and Design of Solar Thermal Systems Maria Cristina Munari Probst, Christian Roecker, 2011-01-01 Although solar thermal systems are technologically mature and cost effective, they have not yet been sufficiently used in building design to play an adequate role in the reduction of fossil fuel consumption. One main hindrance to adoption is the generally low architectural design quality of the building integration of these thermal systems. Starting from a definition of architectural integration quality and related criteria, this book is intended to help both architects and manufacturers improve their design work. **Energy Research Abstracts**, 1990 Fiscal Year 1992 Authorization for the Department of Energy's Renewable Energy and Energy Conservation Programs United States. This book presents the proceedings of GEESD2022, the 3rd International Conference on Green Energy, Environment and Sustainable Development. Due to continuing travel restrictions as a result of the COVID-19 pandemic, the conference was held as a hybrid event, part face-to-face in Beijing, China, and partly online via Zoom on 29 June 2022. The 141 papers included here were selected after a rigorous 6-month process of evaluation and peer review from the more than 300 submissions received and are grouped into 7 sections: energy system and smart control; sustainable and green energy; environmental modeling and simulation; environmental science and pollution research; ecology and rural environment; building and environment; and water and mineral resources. The book provides an overview of the most up-to-date findings and technologies current in green energy, environment, and sustainable development today and will be of interest to all those working in the field. **Renewable and Waste-Heat Utilisation Technologies** Naresh Kumar B.
