Sandinista Nicaragua's Resistance to US Coercion Héctor Perla, Jr, 2017-02-17 How was the Sandinista National Liberation Front FSLN of Nicaragua able to resist the Reagan Administration's coercive efforts to rollback their revolution? Hector Perla challenges conventional understandings of this conflict by tracing the process through which Nicaraguans both at home and in the diaspora defeated US aggression in a highly unequal confrontation. He argues that beyond traditional diplomatic military and domestic state policies a crucial element of the FSLN's defensive strategy was the mobilization of a transnational social movement to build public opposition to Reagan's policy within the United States thus preventing further escalation of the conflict. Using a contentious politics approach the author reveals how the extant scholarly assumptions of international relations theory have obscured some of the most consequential dynamics of the case. This is a fascinating study illustrating how supposedly powerless actors were able to constrain the policies of the most powerful nation on earth.

Anti-Colonial Texts from Central American Student Movements 1929-1983 Heather A Vrana, 2017-03-01 Collects more than sixty foundational documents from student protest from the frontlines of revolution. Few people know that student protest emerged in Latin America decades before the infamous student movements of Western Europe and the U.S. in the 1960s. Even fewer people know that Central American university students authored colonial agendas and anti-colonial critiques. In fact, Central American students were key actors in shaping ideas of nation, empire, and global exchange. Bridging a half-century of student protest from 1929 to 1983, this source reader contains more than sixty texts from Guatemala, Nicaragua, Honduras, El Salvador, and Costa Rica, including editorials, speeches, manifestos, letters, and pamphlets. Available for the first time in English, these rich texts help scholars and popular audiences alike to rethink their preconceptions of student protest and revolution. The texts also illuminate key issues confronting social movements today: global capitalism, dispossession, privatization, development, and state violence. Key Features: Makes available for the first time to English language readers a diverse archive of more than sixty foundational documents and ephemera accompanied by an introduction, section introductions, and further reading. Expands the geographic scope of anti-colonial movement scholarship by presenting anti-colonial thought in the most contentious decades of the 20th century from a region peripheral even within anti-colonial and postcolonial studies. Advances anti-colonial and postcolonial studies by taking urban students as critical actors and so recasting thematics of the peasantry, the rural-urban divide, and religion. Suggests a new social movement chronology beyond the so-called Global 1968 or the common notion that student movements peaked in May 1968 in Paris.
