Maltz,Stephen K. Rice,2015-06-09 This book covers research design and methodology from a unique and engaging point of view based on accounts from influential researchers across the field of Criminology and Criminal Justice Most books and articles about research in criminology and criminal justice focus on how the research was carried out the data that were used the methods that were applied the results that were achieved While these are all important they do not present a complete picture Envisioning Criminology Researchers on Research as a Process of Discovery aims to fill that gap by providing nuance the back story of why researchers selected particular problems how they approached those problems and how their background training and experience affected the approaches they took As the contributions in this book demonstrate research is not a cut and dried process as all too many methods books imply but a living breathing and in some ways quirky process that is influenced by non scientific factors The path taken by a researcher is important and an appreciation of his or her background experience knowledge and the setbacks and triumphs

of performing the research provides a much more complete picture of how research is done The twenty eight chapters in this book describe the back stories of their authors which serve to enlighten readers about the interplay between the personal and the methodological While primarily aimed as a textbook this work will also be of interest to researchers in Criminology and Criminal Justice and related Social and Behavioral Science fields as an account of how seminal researchers in the field developed their key contributions
