web nov 14 2023 in building the circuit in figure 1 through the simulator adjust the small resistance of the battery to zero and put in series a small resistance as required from the design for instance for e1 you will need a battery with v 6v and you will need to put in series a small resistance of $0.5\ \Omega$ to simulate the small resistance in a battery

what is circuit simulation how it works synopsis - Apr 29 2022

web circuit simulation is a process in which a model of an electronic circuit is created and analyzed using various software algorithms which predict and verify the behavior and performance of the circuit since fabrication of electronic circuits especially integrated circuits ics is expensive and time consuming it is faster and more cost effective to

circuit inquiry lab phet contribution phet interactive simulations - Nov 24 2021
