Strategic Air Defense:

History of Strategic Air and Ballistic Missile Defense: 1956-1972, 2009 From the book's Foreword In the early 1970s the U S Army Center of Military History contracted with BDM Corporation for a history of U S efforts to counter Soviet air and missile threats during the Cold War The resulting two volume History of Strategic Air and Ballistic Missile Defense covers the years 1945 1972 when the strategic arms competition between the United States and the Soviet Union was at its height The study was first published for limited distribution in 1975 and recently declassified with minimal redaction These volumes address the passive and active defense strategies technologies and techniques adopted by both U S and Soviet defense planners Much of their actions centered around three common questions How might we be attacked How shall we defend our country What can technology do to solve the basic problems of defending against this new intercontinental threat

History of Strategic Air and Ballistic Missile Defense: 1945-1955, 2009 From the book's Foreword In the early 1970s the U S Army Center of Military History contracted with BDM Corporation for a history of U S efforts to counter Soviet air and missile threats during the Cold War The resulting two volume History of Strategic Air and Ballistic Missile Defense covers the years 1945 1972 when the strategic arms competition between the United States and the Soviet Union was at its height The study was first published for limited distribution in 1975 and recently declassified with minimal redaction These volumes address the passive and active defense strategies technologies and techniques adopted by both U S and Soviet defense planners Much of their actions centered around three common questions How might we be attacked How shall we defend our country What can technology do to solve the basic problems of defending against this new intercontinental threat *History of Strategic Air and Ballistic Missile Defense* United States Army, 2015-01-22 In 1975 U S Army Center of Military History commissioned a report on the History of Strategic Air and Ballistic Missile Defense Volume I 1945 1955 and Volume II 1956 1972 which was part of a larger study of the strategic arms competition that developed between the United States and the Soviet Union after World War II The report addresses each country's approach to civil defense against the threat from the air and each country's emphasis on specific elements of air defense strategy at various periods between 1945 and 1972 Two central questions concerned the U S and Soviet defense planners How might we be attacked and How shall we defend our country Overall technological changes were the predominant factor affecting air and missile defense strategy during the period primarily as they related to the developing offensive threat The scope and pace of technological innovations introduced a measure of uncertainty placed considerable strain on the stability of the U S Soviet relationship and raised fundamental challenges to previous concepts of how best to defend the United States U S strategy was built on the variety of new weapon system developments while Soviet defense trends demonstrated Soviet awareness and responded to developments in U S strategic offensive forces The basic patterns of action were set by initial and early strategic choices Thereafter the strategic problem centered on technological development Threat perceptions increasingly involved possible

application of new technologies by the Soviets in order to define or delimit future threats Perceptions of future threats were influenced by the view of available technologies whether or not the Soviets had demonstrated the capacity to apply them Available or known technologies were extrapolated to assess future threats However a direct action reaction cycle was not seen as a factor in the development of U S and Soviet strategic air and missile defense systems

History of Strategic and Ballistic Missile Defense: Volume II Barry Leonard,2011 This is a print on demand edition of a hard to find publication This is the second of two vol on the history of strategic air and ballistic missile defense from 1945 to 1972 It covers 1955 1972 and is organized into five interrelated chapters Chapter I provides a comparison of U S and Soviet strategies Chapters II and III deal with U S strategy and Soviet strategy while Chapters IV and V cover U S systems and Soviet systems The Executive Summary has three major groupings one to reflect the contextual setting of decision making circa 1955 the second to highlight strategic air defense policy comparisons and contrasts 1955 1972 and a third to present judgments and conclusions about the results of the play of factors and perceptions which molded air defense decisions during these years Illustrations

Congress. House,1967 **Atomic Audit** Stephen I. Schwartz,2011-12-01 Since 1945 the United States has manufactured and deployed more than 70 000 nuclear weapons to deter and if necessary fight a nuclear war Some observers believe the absence of a third world war confirms that these weapons were a prudent and cost effective response to the uncertainty and fear surrounding the Soviet Union s military and political ambitions during the cold war As early as 1950 nuclear weapons

were considered relatively inexpensive providing a bigger bang for a buck and were thoroughly integrated into U S forces on that basis Yet this assumption was never validated Indeed for more than fifty years scant attention has been paid to the enormous costs of this effort more than 5 trillion thus far and its short and long term consequences for the nation Based on four years of extensive research Atomic Audit is the first book to document the comprehensive costs of U S nuclear weapons assembling for the first time anywhere the actual and estimated expenditures for the program since its creation in 1940 The authors provide a unique perspective on U S nuclear policy and nuclear weapons tracking their development from the Manhattan Project of World War II to the present day and assessing each aspect of the program including research development testing and production deployment command control communications and intelligence and defensive measures They also examine the costs of dismantling nuclear weapons the management and disposal of large quantities of toxic and radioactive wastes left over from their production compensation for persons harmed by nuclear weapons activities nuclear secrecy and the economic implications of nuclear deterrence Utilizing archival and newly declassified government documents and data this richly documented book demonstrates how a variety of factors the open ended nature of nuclear deterrence faulty assumptions about the cost effectiveness of nuclear weapons regular misrepresentation of and overreaction to the Soviet threat the desire to maintain nuclear superiority bureaucratic and often arbitrary decisions pork barrel politics and excessive secrecy all drove the acquisition of an arsenal far larger than what many contemporary civilian and military leaders deemed necessary Atomic Audit concludes with recommendations for strengthening atomic accountability and fostering greater public understanding of nuclear weapons programs and policies
