The Political Economy of Fiscal Reform in Central-Eastern Europe Frank Bönker, 2006-01-01. Frank Bönker has done a masterful job. Transforming Mozambique M. Anne Pitcher, 2002-11-14. Many of the economic transformations in Africa have been as dramatic as those in Eastern Europe. Yet much of the comparative literature on transitions has overlooked African countries. This 2002 study of Mozambique's shift from a command to a market economy draws on a wealth of empirical material including archival sources, interviews, political posters and corporate advertisements to reveal that the state is a central actor in the reform process despite the claims of neo-liberals and their critics. Alongside the state, social forces from World Bank officials to rural smallholders have also accelerated, thwarted or shaped change in Mozambique. M. Anne Pitcher offers an intriguing analysis of the dynamic interaction between previous and emerging agents, ideas and institutions to explain the erosion of socialism and the politics of privatization in a developing country. She demonstrates that Mozambique's political economy is a heterogeneous blend of ideological and institutional continuities and ruptures.

Beyond Continuity Wolfgang Streeck, Kathleen Thelen, 2005-03-10. Debates surrounding institutional change have become increasingly central to Political Science, Management Studies and Sociology, opposing the role of globalization in bringing about a convergence of national economies and institutions on one model to theories about Varieties of Capitalism. This book brings together a distinguished set of contributors from a variety of disciplines to examine current theories of institutional change. The chapters highlight the limitations of these theories, finding them lacking in the analytic tools necessary to identify the changes occurring at a national level and therefore tend to explain many changes and innovation as simply another version of previous situations. Instead, a model emerges of contemporary political economies developing in incremental but cumulatively transformative processes. The contributors show that a wide but not infinite variety of models of institutional change exist which can meaningfully be distinguished and analytically compared. They offer an empirically grounded typology of modes of institutional

change that offer important insights on mechanisms of social and political stability and evolution generally Beyond Continuity provides a more complex and fundamental understanding of institutional change and will be important reading for academics researchers and advanced students of Political Science Management Studies Sociology and Economics *Restructuring the Chinese City* Laurence J.C.
