incorporate cleansing and detoxification strategies in order to maintain health In fact numerous health disorders have now been attributed to synthetic and environmental toxins including cancers respiratory diseases joint degeneration digestive issues skin issues cognitive difficulties and so many other conditions The question now is how do we efficiently and effectively cleanse the overload of toxins from our bodies Many recommend radical and difficult detoxification programs that can actually do more harm than good These can stress our elimination systems and immune systems and overwhelm us with toxemia These blitz methods of cleansing can not only be unsafe Most are also unsustainable due to their complexity expense and regimented sacrifices The author a California Naturopath and board certified Alternative Medical Practitioner offers us a completely different strategy one that is not only safe gentle and gradual but sustainable throughout our lifetime The Living Cleanse is a groundbreaking sustainable system that will stimulate our immune system to more efficiently break down and rid the body of toxins without over stressing our bodies and minds or require radical difficult expensive and possibly unsafe methods

The Final Empire Wm. H. Kötker, 2007-11 In spite of its tough message there is much compassion and humanity in *The Final Empire* Right away as you begin to read this work you sense increasingly the grand perspective in Kötker's words He is not speaking of anarchy He is offering vital common sense It's just that his meaning is so unavoidably political And so much against what we have been taught all our lives The materialistic values of civilization teach us that the accumulation of wealth is progress The material wealth of the civilization is derived from the death of the earth the soils the forests the fish stocks the free resources of flora and fauna The ultimate end of this is for all human species to live in giant parasitical cities of cement and metal while surrounded by deserts of exhausted soils The simple polar opposites are the richness and wealth of the natural life of earth versus the material wealth of people living out their lives in artificial environments This amounts to a direct challenge to humankind A demand for radical change A re envisioning of our part in the community of life and the precepts of individuality And Mr Kötker provides a strong argument for this case He traces the environmental scars of civilization through the ages Empire after empire desertification of the top soil winds its way around the globe in an erosive helix from China to India to Mesopotamia to Italy to North America As radical as it may seem at first glance *The Final Empire* is a necessary and sensible primer for the recovery of the planet It blends a critical statistical analysis of our deteriorating environment with a positivism of hope for a post empire age and a new whole human relation to the living community of Earth Dan Armstrong Author of the Novels *Prairie Fire* and *Taming the Dragon*
