The Japanese Automobile Industry

Robert Cole, Taizo Yakushiji

The Japanese Automobile Industry:

The Japanese Automobile Industry Koichi Shimokawa,1994 In this authoritative account of the Japanese automobile industry Professor Shimokawa focuses upon its business success as a relative latecomer to the worldwide market He includes profiles of the leading producers including Toyota Nissan Honda and Mitsubishi and highlights the features of their success in management and design BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

The Japanese Automobile Industry Michael A. Cusumano,2020-03-17 A detailed study of the history of the Japanese automotive industry focusing primarily on the rise of Toyota and Nissan The study seeks to understand how Japan started manufacturing motor vehicles and eventually passed the U S manufactures in terms of productivity and Europeans in terms of small car design Provided numerous details on the Japanese production process and analyzes the role of Japanese government policy including protectionism and technology transfer

The American and Japanese Auto Industries in Transition Robert Cole,Taizo Yakushiji,1984-01-01 This report was prepared for the Policy Board by the U S and Japanese research staffs of the Joint U S Japan Automotive Study under the general direction of Professors Paul W McCracken and Keichi Oshima with research operations organized and coordinated by Robert E Cole on the U S side in close communication with the Taizo Yakushiji on the Japanese side preface In view of the importance of stable long term economic relationships between Japan and the United States automotive issues have to be dealt with in ways consistent with the joint prosperity of both countries Furthermore the current economic friction has the potential to adversely affect future political relationships Indeed under conditions of economic stagnation major economic issues inevitably become political issues With these considerations in mind the Joint U S Japan Automotive Study project was started in September 1981 to determine the conditions that will allow for the prosperous coexistence of the respective automobile industries During this two year study we have identified four driving forces that will play a major role in determining the future course of the automotive industry of both countries These are 1 consumers demands and aspirations vis vis automobiles 2 flexible manufacturing systems FMS 3 rapidly evolving technology and 4 the internationalization of the automotive industry exec summary

The Japanese Automotive Industry Robert Cole,1981-01-01 As the University of Michigan Center for Japanese Studies reflected on the deteriorating position of the domestic auto industry in the fall of 1980 and the strong competitive threat being posed by the Japanese automakers we were struck by the extraordinary low quality of the public discussion of these critical issues The national importance of the issues seemed only matched by the superficiality of the analyses being offered The tendency to think in terms of scapegoats was particularly evident The Japanese as the basic cause of our problems has been a particularly notable theme To be sure cooperation with the Japanese in formulating a rational overall trade policy may be an important part of the solution It has also been fashionable to blame it all on American auto industry management for not concentrating on the production of small cars when everyone knew that was the thing to do Alternatively government meddling was blamed

for all our problems Clearly the complex problem we faced required more penetrating analyses It seemed therefore that the time was ripe for a public seminar which moved beyond the rhetoric of the moment and probed some of the deeper causes of our problems and possible directions for future policy In holding the January 1981 auto conference the Center took it as their task to begin addressing the critical issues facing the industry with particular but not exclusive attention to examining the role of the Japanese auto industry They had in mind not to simply conduct a rational discussion of the trade issue but to probe the sources of Japanese competitive strength especially those features whose study might profit them In these proceedings they bring those discussions to a wider audience Question and answer sessions at the conference were necessarily short and a few speakers delivered abbreviated remarks this volume restores a number of omissions and provides additional answers to some pertinent questions put by the audience The Center hopes to encourage the serious problem solving these complex issues demand Far too much time has been spent trying to fix the blame intro **Japan and the**

Global Automotive Industry Koichi Shimokawa,2010-06-03 The Japanese automotive industry enjoyed spectacular success in the 1980s This was largely due to the so called Lean Production System the combination of an efficient production system an effective supplier system and a product development system In the 1990s the industry fell on hard times because of the Japanese asset price bubble and extreme currency appreciation In this book eminent industry specialist Koichi Shimokawa draws on his thirty years of research and fieldwork with Japanese and American firms to show how the Japanese automotive industry has managed to recover from this difficult period He shows how firms like Toyota were able to transfer Japanese systems to overseas plants and how they have changed in order to compete in increasingly globalized markets In addition the book also addresses the two major challenges to the current industry model the rise of China and the environmental and energy supply situation *The Japanese Automobile Industry*,1994-01-20 In less than 30 years the Japanese automobile

industry has risen from obscurity to become the world s leading automobile producer This bibliography which lists over 600 English language titles focuses on the Japanese automobile industry and its development in the postwar era especially the period of mass expansion from 1980 to the present It touches particularly on topics pertaining to the Japanese automobile industry as it relates to the U S automobile industry including the operation of the two industries Japanese transplants in the United States and government trade issues It also features case studies of major Japanese automobile manufacturers Coverage includes books articles conference papers periodicals government documents and audio visual materials Entries are fully annotated and the work is indexed **The Origin of Competitive Strength** Akira Kawahara,2012-12-06 When the

war ended on August 15 1945 I was a naval engineering cadet at the Kure Navy Yard near Hiroshima Japan A week later I was demobilized and returned to my home in Tokyo fortunate not to find it ravaged by firebombing At the beginning of September a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo Near my home I watched a procession of American military motor vehicles snaking along Highway 1

This truly awe inspiring cavalcade included jeeps two and a half ton trucks and enormous trailers mounted with tanks and artillery At the time I was a 21 year old student in the Machinery Section of Engineering at the Tokyo Imperial University Watching that magnificent parade of military vehicles I was more than impressed by the gap in industrial strength between Japan and the U S That realization led me to devote my whole life to the development of the Japanese auto industry I wrote a small article concerning this incident in Nikkei Sangyo Shimbun one of the leading business newspapers in Japan on May 2 1983 The English translation of this story was carried in the July 3 1983 edition of the Topeka Capital Journal and the September 13 1983 issue of the Asian Wall Street Journal The Topeka Capital Journal headline read MacArthur s Jeeps Were the Toyota Catalyst The Decline of the Japanese Automobile Industry Michael Smitka,1992 *A History of Japan's Government-Business Relationship* Phyllis Genther,1990-01-01 Despite the economic and political importance of the U S Japan relationship and the extensive attention paid to automotive trade few American scholars or policy makers are familiar with the history of Japanese government business relations either generally or for specific industries such as passenger cars This book hopefully helps in a small way to fill that gap in our knowledge and thus to help strengthen the foundation from which we make public policy decisions about bilateral trade ix The Japanese Auto Industry and the U.S. Market C.
