John Deyell, Rila Mukherjee

The Journal Of Burma Studies Volume 3 1998:

The Journal of Burma Studies, 2004 **Pelagic Passageways** Rila Mukherjee, 2011 Due to the frontierization of nation states maritime historians have tended to ignore the northern Bay of Bengal Yet this marginal region now dispersed over the four nation states of India China Myanmar and Bangladesh was not marginal in the past Until recently however historians have concentrated largely on the big four the Gujarat Malabar Coromandel and western Bengal coasts Extreme eastern South Asia Bengal and the lands to its north east fanning into Burma and China or modern India's north east and beyond is the focus of Pelagic Passageways This regional unit including diverse topographic features plains forests estuaries deltas rivers mountains lakes plateaus and remote passes oscillates between unity and fragmentation between centrality and marginality in the larger space of the Bay of Bengal To attempt a history of this space is indeed challenging There is not one but two deltas here the western delta corresponding to present West Bengal in India and centred now on Kolkata and the south eastern delta in present Bangladesh centred on Dhaka and running into Arakan Not merely in terms of location but on a historical axis too the two deltas are vastly different as they have followed disparate trajectories dictated in part by their geographies Pelagic Passageways therefore questions the conventional fault line located on the south eastern Bengal delta between the historiography of South and South East Asia Concentrating on commodity and currency flows travel trade routes and interactive networks Pelagic Passageways visualizes the cultural space of the northern Bay of Bengal as embracing upland landlocked areas Ava Yunnan the Tripuri Dimas and Ahom states not usually seen as part of maritime history This collection of essays suggests that they too were a part of the social and commercial networks of the Indian Ocean While these countries literally fell off the map this volume proposes that we see these areas instead as crossroads mediating flows between the land dwelling and aquatic worlds Eastern Indian Ocean Lipi Ghosh, 2011-05-25 The Indian Ocean has attracted scholarly attention through ages As we talk of inter Asian linkages and inter regional arena studies the connections through the Bay of Bengal Eastern Indian Ocean is a fascinating subject This book is an attempt to understand how these issues of commercial and cultural linkages manifest along the Eastern Indian Ocean from the past to the present It aims to look at the various dimensions of the contemporary Eastern Indian Ocean and seeks to determine whether the past has any role to play in shaping contemporary contexts The discussions in the book will show how the revival of an ancient linkage can stimulate contemporary international trade and can promote regional cooperation The findings of the book will definitely lay the foundations for future analyses of the emerging India South East Asia relationship It is expected to be a pioneering attempt for a comprehensive and multidisciplinary examination of the region under review **Writing Disaster in South Asian Literature and Culture** Sk Sagir Ali, Swayamdipta Das, 2024-05-15 Writing Disaster in South Asian Literature and Culture The Limits of Empathy and Cosmopolitan Imagination looks at the myriad ways in which disaster events both man made and natural are perceived and represented in South Asian literature and culture This book explores the affective

mechanisms of empathy and imaginary identification which are conditioned and reiterated by biopolitical statist regimes of power to preempt and coopt any radical agential or cognitive intervention which might be evinced by the event of the disaster The contributors also examine South Asian disasters vis a vis the registers of ecological crises migration events civil and liberation wars and pandemics to understand the multifarious ways in which such disasters are used as tropes to peddle certain structures of interpellation in the collective consciousness

John Deyell, Rila Mukherjee, 2019-08-09 Money is central to the functioning of economies yet for the pre modern period our knowledge of monetary systems is still evolving Until recently historians of the medieval world have conflated the use of coins with a high degree of monetization States without coinage were considered under monetized It is becoming more evident however that some medieval states used money in complex ways without using coinage Moneys of account supplanted coins wholly or in part But there is an imbalance of evidence coins survive physically while intangible forms of money leave little trace This has skewed our understanding Since coin usage has been well studied in the past these essays flesh out our consideration of societies that used money but struck no coins Absence or shortage of coining metals was not the causative factor some of these societies had access to metal supplies but still remained coinless Was this a strategic choice Does it reflect the unique system of governance that developed in each kingdom It is surely time to unravel this puzzle This book examines money use in the Bay of Bengal world using the case of medieval Bengal as a fulcrum Situated between mountains and the sea this region had simultaneous access to both overland and maritime trade routes How did such cashless economies function internally within their regions and in the broader Indian Ocean context This volume brings together the thoughts of a range of upcoming scholars and a sprinkling of their elders on these and related issues Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

The Paradox of Myanmar's Regime Change Roger Huang, 2020-04-06 This book analyzes Myanmar's contemporary political history arguing that Myanmar's so called democratization has always been a calculated regime transition planned by the military with every intention that the military to remain the key permanent political actor in Myanmar's political regime Using the period since Myanmar's regime change in 2011 as an extended case study this book offers an original theory of regime transition The author argues that Myanmar's ongoing regime transition has not diverged from its authoritarian military roots and explains how the military has long planned its voluntary partial withdrawal from direct politics Therefore Myanmar's disciplined democracy contains features of democratic politics but at its core remains authoritarian Providing an original contribution to the theoretical literature on regime change by developing a theory of trial and error regime transition the book engages with and challenges the popular democratization theory by arguing that this theory does not sufficiently explain hybrid regimes or authoritarian durability Additionally the book adds to an alternative understanding of how the regime transition was initiated by examining the historical evolution of Myanmar's post colonial regime and offers a fresh

perspective on contemporary political developments in Myanmar An important contribution to the study of authoritarian durability and the dynamics of regime change in Southeast Asia this book will be of interest to academic researchers of comparative politics international relations and Southeast Asian studies *The Political Theory of Tyranny in Singapore and Burma* Stephen McCarthy, 2006-04-18 Covering various fields in political science this new book presents an historical and political cultural analysis of Buddhism and Confucianism Using Singapore and Burma as case studies the book questions the basic assumptions of democratization theory examining the political science of tyranny and exploring the rhetorical manipulation of religion for the purpose of political legitimacy A welcome addition to the political science and Asian studies literature McCarthy addresses many of the current issues that underlie the field of democratization in comparative politics and discusses the issue of imposing Western cultural bias in studying non Western regimes by analyzing rhetorical traits that are universally regular in politics **Burma, Kipling and Western Music** Andrew Selth, 2016-11-03 For decades scholars have been trying to answer the question how was colonial Burma perceived in and by the Western world and how did people in countries like the United Kingdom and United States form their views This book explores how Western perceptions of Burma were influenced by the popular music of the day From the First Anglo Burmese War of 1824-6 until Burma regained its independence in 1948 more than 180 musical works with Burma related themes were written in English speaking countries in addition to the many hymns composed in and about Burma by Christian missionaries Servicemen posted to Burma added to the lexicon with marches and ditties and after 1913 most movies about Burma had their own distinctive scores Taking Rudyard Kipling's 1890 ballad Mandalay as a critical turning point this book surveys all these works with emphasis on popular songs and show tunes also looking at classical works ballet scores hymns soldiers songs sea shanties and film soundtracks It examines how they influenced Western perceptions of Burma and in turn reflected those views back to Western audiences The book sheds new light not only on the West's historical relationship with Burma and the colonial music scene but also Burma's place in the development of popular music and the rise of the global music industry In doing so it makes an original contribution to the fields of musicology and Asian Studies Forests and Ecological History of Assam, 1826-2000 Arupjyoti Saikia, 2011-02-07 This book presents a comprehensive account of the transformation of Assam's forests and ecology from early nineteenth century to the end of the twentieth century It locates present day ecological conflicts in the colonial era when contest over forest land and resource began to take new shape Arupjyoti Saikia delineates how forest resources in Assam were mapped and integrated with merchant capitalism since the early nineteenth century He shows how imperial forestry practices led to changes in traditional resource utilization patterns The book also examines the political economy of conservation practices It explores the question of law and conservation role of institutions and organizations and the changing role of the forests in imperial economy The book argues how the making of forest policy in the postcolonial period was defined by the complexities of the political matrix It discusses plantation silvicultural practices protection and

regeneration of forests and livelihood practices The author also analyses public debates surrounding ecology and environmental changes in conservation practices after the 1980 Act *Southeast Asia* Peter Bellwood, Dr Ian Glover, 2023-05-09 This comprehensive and absorbing book traces the cultural history of Southeast Asia from prehistoric especially Neolithic Bronze Iron age times through to the major Hindu and Buddhist civilizations to around AD 1300 Southeast Asia has recently attracted archaeological attention as the locus for the first recorded sea crossings as the region of origin for the Austronesian population dispersal across the Pacific from Neolithic times as an arena for the development of archaeologically rich Neolithic and metal using communities especially in Thailand and Vietnam and as the backdrop for several unique and strikingly monumental Indic civilizations such as the Khmer civilization centred around Angkor Southeast Asia is invaluable to anyone interested in the full history of the region
