The Journal of Irreproducible Results George H. Scherr,1976 *The Journal of Irreproducible Results II* George H. Scherr,Jim Glenn,1997 *The Journal of Irreproducible Results* ,1982 *The Journal of Irreproducible Results* George H. Scherr,Rita Y. Scherr,1975 **Journal of Irreproducible Results, Inc. V. Mehlman** ,1986 *Archives of Library Research From the Molesworth Institute* Norman D Stevens,Peter Gellatly,2018-10-24 An anthology of library humor by the director of the mythical Molesworth Institute Norman Stevens this book is sure to provide librarians with many hours of amusement This collection is full of Stevens most memorable papers describing the odd kinds of research conducted by the Institute such as a sophisticated study of the disappearance of umbrellas in libraries a computer analysis of library postcards and a precostretrieval scheme to accelerate the disintegration of book pages while saving the letters in them *Archives of Library Research* from the Molesworth Institute is also well stocked with unforgettable one liners such as the author s plan to solve a major space problem for libraries by microfilming all Braille books The imaginary Molesworth Institute has taken on a life of its own since its story first appeared in the ALA Bulletin in 1963 Stevens writes mostly for fun and entertainment but also to stress the point that librarians should take a less serious view of their work After all as Stevens points out in this anthology The library world like the real world is impossible to understand on a rational basis Now librarians can enjoy the convenience of having Stevens most treasured papers spanning over two decades all in one very funny book **Handbook of Writing for the Mathematical Sciences** Nicholas J. Higham,1998-08-01 Nick Higham follows up his successful HWMS volume with this much anticipated second edition *Index of Selected Publications* Center for Naval Analyses,1981

Scientific Information Transfer: The Editor's Role M. Balaban,2012-12-06 It was Faraday who in 1821 said that there are three necessary stages of useful research The first to begin it the second to end it and the third 1 to publish it There has since indeed been so much research and publication that we have become increasingly alarmed by the galloping proliferation of scientific information produced in relation to the user s ability to retrieve and consume it effectively conveniently and creatively In 1948 to deal with this concern the Royal Society Scientific Information Conference held in London spanned the whole realm of scientific information Sir Robert Robinson President of the Royal Society in his opening address noted that the study of scientific information services in all its ramifications has enormous scope and the London conference dealt with scientific publication format editorial policy subject grouping organization abstracting reviews classification indexing and training of information officers It was about this time that information science began to develop more on the retrieval end so it seems logical that the first editors group founded in 1949 was ICSU AB the International Council of Scientific Unions Abstracting Board In 1958 the National Academy of Sciences International Conference of 2 Scientific Information in Washington limited its interests and expanded on the later phases of the life cycle of information storage and retrieval
