The Social Context of Learning and Development John C. Glidewell,1977 **The Social Context of Learning and Development** John C. Glidewell,1977 The Social Contexts of Young People ,2024-02-14 This edited volume investigates young people within their social contexts The focus is on engaging young people as they transition from youth into young adulthood Key advantages of this book are its embodiment of interdisciplinarity in gathering research across a range of diverse methods theories settings and countries The volume begins with reviews of key theories and methods in understanding young people within their social networked contexts of generosity networks identity and ethnic heritage The second section includes chapters attending to education and work as contexts for transitions to adulthood counseling meaning and aesthetics from high school to college and into workplaces The third section includes chapters studying community engagement and the well being of young people including social support meaning in life religiosity spirituality stress coping yoga and sports The diverse topics addressed in this edited volume are generosity philanthropy voluntary action social networks social identity personhood ethnic heritage post colonialism intersectionality personality lived experiences informal economy sustainability pandemic family support educational counselors motivation Not in Education Employment or Training NEET everyday aesthetics built environment generativity community adult allies youth engagement life satisfaction spiritual identity religious affiliation stress practicing yoga sexual violence athletes sports climate pressures to perform resilience and neurodiversity Disciplines span economics business education sociology psychology medical science geography journalism architecture engineering science and technology and applied sciences Methods include quantitative surveys qualitative in depth interviews life course biographies ethnographic case studies bibliometric analysis and integrative reviews Young people are investigated across thirteen countries including the United States United Kingdom Yemen Ghana Bahrain Norway Denmark Finland Sweden Iceland Canada Romania and the Netherlands **The Social Context of Cognitive Development** Mary Gauvain,2001-01-01 Traditional approaches to cognitive development can tell us a great deal about the internal processes involved in learning Sociocultural perspectives on the other hand provide valuable insights into the influences on learning of relationship and cultural variables This volume provides a much needed bridge between these disparate bodies of research examining the specific processes through which children internalize the lessons learned in social contexts The book reviews current findings on four specific domains of cognitive development attention memory problem solving and planning The course of intellectual growth in each domain is described and social factors that support or constrain it are identified The focus throughout is on how family peer and community factors influence not only what a child learns but also how learning occurs Supporting her arguments with solid empirical data the author convincingly shows how attention to sociocultural factors can productively complement more traditional avenues of investigation The Social Context of Adult Learning in Africa Sabo Amin Indabawa,Stanley Mpofo,2006 This book examines how adult education

is influenced by and has an influence on the society in which it takes place It presents a clear analysis of the development challenges and sociological realities of the adult education context and explores the potential of adult education to help African countries and communities achieve their developmental goals Issues discussed include adult education social change and development community education race ethnicity and religion social class and gender empowerment democracy health and HIV AIDS poverty and debt globalisation and the environment *Campus Service Workers Supporting First-Generation Students* Georgina Guzmán,La'Tonya Miles,Stephanie Youngblood,2021-11-29 This unique collection of testimonials critical essays and first hand accounts demonstrates the significant contribution of campus service workers in supporting the retention and success of first generation college students Using a Freirean framework to ground individual stories the text identifies ways in which campus workers connect with students provide informal mentorship and offer culturally relevant support during students transition to college and beyond Drawing on a range of interviews case studies and research studies emphasis is placed on the unique challenges faced by first generation and minority students such as cultural alienation imposter syndrome language barriers and financial insecurity Ultimately the text dismantles notions of social hierarchies that separate workers and college students and encourages institutions to invest in these workers and their contribution to student well being and success This book will benefit researchers academics and educators with an interest in the higher education and student affair practice and higher education administration more broadly Those specifically interested in multicultural education and the study of race and ethnicity within US higher educational contexts will also benefit from this book Work, Subjectivity and Learning Stephen Billett,Tara Fenwick,Margaret Somerville,2007-06-03 In recent year efforts to understand learning for and throughout working life have moved away from a focus on workplace training to concerns about learning as a component and outcome of engaging in work and work related activities and interactions This shift acknowledges a broader set of workplace factors that shape workers learning and development Yet equally it acknowledges that this learning through engagement is also necessarily shaped by the diverse ways that individuals elect to engage or participate in workplace activities Central here is the issue of individuals subjectivity and how this is shaped by but shapes engagement in work and therefore what learning flows from their participation It is in considering the relations among subjectivity learning and work that it is possible to advance both the conceptual and procedural bases for understanding learning through and for working life Moreover the focus on relations among subjectivity work and learning represents a point of convergence for diverse disciplinary traditions and practices that are provided by the book s contributors In this way the contributions represent something of the emerging perspectives that are elaborating the complex relations among subjectivity work and learning and circumstances in which they are played out **Encyclopedia of Bilingual Education** Josue M.
