Leimer, 1995 Studies the balance between social security taxes and benefits over workers entire lifetimes *Economic Concepts for the Social Sciences* Todd Sandler, 2001-09-17 The primary purpose of this book is to present some of the key economic concepts that have guided economic thinking in the last century and to identify which of these concepts will continue to direct economic thought in the coming decades This book is written in an accessible manner and is intended for a wide audience with little or no formal training in economics It should also interest economists who want to reflect on the direction of the discipline and to learn concepts and achievements in other subfields The author imparts his enthusiasm for the economic way of reasoning and its wide applicability Through the abundant use of illustrations and examples the author makes concepts understandable and relevant Topics covered include game theory the new institutional economics market failures asymmetric information endogenous growth theory general equilibrium rational expectations and others *Warm Hands in Cold Age* Nancy Folbre, Lois Shaw, Agneta Stark, 2013-09-13 Public discussion of population aging usually focuses on the financial burden that increasingly elderly populations will impose on younger generations Scholars give much less attention to who does the actual work of day to day care for those no longer able to care for themselves and although women are the majority among the elderly little is heard about gender differences in economic resources or the need for care This volume is dedicated to giving gender and a full range of social and cultural

differences their rightful place in these discussions The authors address amongst other issues the worldwide dilemmas of eldercare the structure of income and care provisions for older populations the role of family marital status and class in these provisions the impact of policies affecting retirement age the role of social insurance in preventing poverty among elderly women The essays included address these topics in a myriad of geographical contexts including South Africa the US Palestine Australia South Korea Spain Germany and Sweden The concerns highlighted here also remind us that whether through individual families or social insurance through family caregivers or paid help the oldest generation will continue to depend on adults of working age for its well being This book was previously published as a special issue of Feminist Economics
