Subcommittee on Departments of Labor, and Health, Education, and Welfare, and Related Agencies,1977 Gender and the Contours of Precarious Employment Leah F. Vosko,Martha MacDonald,Iain Campbell,2009-09-10 Precarious employment presents a monumental challenge to the social economic and political stability of labour markets in industrialized societies and there is widespread consensus that its growth is contributing to a series of common social inequalities especially along the lines of gender and citizenship The editors argue that these inequalities are evident at the national level across industrialized countries as well as at the regional level within federal societies such as Canada Germany the United States and Australia and in the European Union This book brings together contributions addressing this issue which include case studies exploring the size nature and dynamics of precarious employment in different industrialized countries and chapters examining conceptual and methodological challenges in the study of precarious employment in comparative perspective The collection aims to yield new ways of understanding conceptualizing measuring and responding via public policy and other means such as new forms of union organization and community organizing at multiple scales to the forces driving labour market insecurity
