STATISTICS FOR SOCIAL SCIENCE

Social Science Statistics

Mark H. Maier

Social Science Statistics:

Social Science Statistics Susan E. Wright, 1986 **Statistics for the Social Sciences** R. Mark Sirkin, 2006 Popular in previous editions this Third Edition continues to help build students confidence and ability in doing statistical analysis by slowly moving from concepts that require little computational work to those that require more Author R Mark Sirkin once again demonstrates how statistics can be used so that students come to appreciate their usefulness rather than fear them Statistics for the Social Sciences emphasizes the analysis and interpretation of data to give students a feel for how data interpretation is related to the methods by which the information was obtained Statistics for the Social Sciences Vicki F. Sharp, 1979 Statistics Explained Perry R. Hinton, 1995 This text outlines the major statistical tests used by undergraduates in the social sciences It provides easy to understand explanations of how and why they are used and aims to make statistics much less mysterious **Statistics** Lyman Ott, William Mendenhall, Richard F. Larson, 1978 **Basic Statistics for Social Research** Robert A. Hanneman, Augustine J. Kposowa, Mark D. Riddle, 2012-12-04 A core statistics text that emphasizes logical inquiry not math Basic Statistics for Social Research teaches core general statistical concepts and methods that all social science majors must master to understand and do social research Its use of mathematics and theory are deliberately limited as the authors focus on the use of concepts and tools of statistics in the analysis of social science data rather than on the mathematical and computational aspects Research questions and applications are taken from a wide variety of subfields in sociology and each chapter is organized around one or more general ideas that are explained at its beginning and then applied in increasing detail in the body of the text Each chapter contains instructive features to aid students in understanding and mastering the various statistical approaches presented in the book including Learning objectives Check quizzes after many sections and an answer key at the end of the chapter Summary Key terms End of chapter exercises SPSS exercises in select chapters Ancillary materials for both the student and the instructor are available and include a test bank for instructors and downloadable video tutorials for students **The Data Game** Mark H. Maier, 1995 This text has been updated for this second edition to include material on AIDS homelessness abortion education and other critical issues It also includes a new chapter on the use and misuse of polling data Statistics in the Social Sciences Stanislav Kolenikov, Lori Thombs, Douglas Steinley, 2010-02-22 A one of a kind compilation of modern statistical methods designed to support and advance research across the social sciences Statistics in the Social Sciences Current Methodological Developments presents new and exciting statistical methodologies to help advance research and data analysis across the many disciplines in the social sciences Quantitative methods in various subfields from psychology to economics are under demand for constant development and refinement This volume features invited overview papers as well as original research presented at the Sixth Annual Winemiller Conference Methodological Developments of Statistics in the Social Sciences an international meeting that focused on fostering collaboration among mathematical statisticians and social

science researchers The book provides an accessible and insightful look at modern approaches to identifying and describing current effective methodologies that ultimately add value to various fields of social science research With contributions from leading international experts on the topic the book features in depth coverage of modern quantitative social sciences topics including Correlation Structures Structural Equation Models and Recent Extensions Order Constrained Proximity Matrix Representations Multi objective and Multi dimensional Scaling Differences in Bayesian and Non Bayesian Inference Bootstrap Test of Shape Invariance across Distributions Statistical Software for the Social Sciences Statistics in the Social Sciences Current Methodological Developments is an excellent supplement for graduate courses on social science statistics in both statistics departments and quantitative social sciences programs It is also a valuable reference for researchers and practitioners in the fields of psychology sociology economics and market research **Beginning Statistics** Ian

Diamond, Julie Jefferies, 2013-02-26 The clarity simplicity and use of many practical examples makes this book very useful primarily for under and postgraduate students Journal of Biosocial Science With an emphasis on description examples graphs and displays rather than statistical formulae this book is the ideal introductory guide for students across the social sciences It shows how all students can understand the basic ideas of statistics at a level appropriate with being a good social scientist The authors explain the right ways to present data how to describe a set of data using summary statistics and how to infer what is going on in a population when all you have to go on is the sample The book uses small data sets to help students understand the basic principles and no mathematics or statistical background is assumed **Statistics for Social Sciences**

T. Rajaretnam, 2015-12-08 A comprehensive guide to the practical applications of statistics in social sciences This book brings out the relevance of statistical tools and methods in social sciences Describing the various statistical techniques it highlights their purpose and application along with a brief overview on how to interpret results and draw inferences Topical and up to date it examines different types of statistical variables and their treatment tabulation and graphical presentation of data theoretical distributions and common parametric and non parametric tests including analysis of variance and correlation ratio linear regression including checking for violation of assumptions transformations of variables and predictions inequality measures such as Lorenz curve Gini coefficient dissimilarity index and human development index among others It will be indispensable for students and scholars of statistics econometrics psychology and those interested in the application of statistics in social sciences
