Stratification in US Society Christopher B. Doob, 2019-05-22 Social Inequality and Social Stratification in US Society uses a historical and conceptual framework to explain social stratification and social inequality The historical scope gives context

to each issue discussed and allows the reader to understand how each topic has evolved over the course of American history. The author uses qualitative data to help explain socioeconomic issues and connect related topics. Each chapter examines major concepts so readers can see how an individual's success in stratified settings often relies heavily on their access to valued resources: types of capital which involve finances, schooling, social networking, and cultural competence. Analyzing the impact of capital types throughout the text helps map out the prospects for individuals, families, and also classes to maintain or alter their position in social stratification systems. Social Stratification and Inequality Harold R. Kerbo, 2002-07

Structured Social Inequality Celia Stopnicka Heller, 1968. Textbook focusing on social change and based on comparisons of social structures in various countries. On social theory of social stratification covers various forms of discrimination and inequality, problems of minority groups, intergroup relations, leadership phenomena, interest group behaviour, realities of ethnography, etc. References: **Social Stratification and Inequality** Harold R. Kerbo, 1991. Social Stratification Melvin Marvin Tumin, 1967. *The Shape of Social Inequality* David Bills, 2005-08-24. This volume brings together former students, colleagues, and others influenced by the sociological scholarship of Archibald O. Haller to celebrate Haller's many contributions to theory and research on social stratification and mobility. All of the chapters respond to Haller's programmatic agenda for stratification research. A full program aimed at understanding stratification requires first that we know what stratification structures consist of and how they may vary; second that we identify the individual and collective consequences of the different states and rates of change of such structures; and third, seeing that some degree of stratification seems to be present everywhere, that we identify the factors that make stratification structures change. The contributors to this Festschrift address such topics as the changing nature of stratification regimes, the enduring significance of class analysis, the stratifying dimensions of race, ethnicity, and gender, and the interplay between educational systems and labor market outcomes. Many of the chapters adopt an explicitly cross-societal comparative perspective on processes and consequences of social stratification. The volume offers both conceptually and empirically important new analyses of the shape of social stratification.
