The book also provides a foundation for the study of linguistic variation within a speech community as well as an introduction to methods of data collection when studying the outcomes of language use choices. An important aspect of this book is its emphasis on a participatory approach to language choice research that empowers the speech community. The final chapter discusses lifestyle concerns that researchers may encounter when conducting field studies in developing nations. Written with the beginner in mind, this textbook includes numerous examples and case studies from around the world to illustrate the realities of sociolinguistic field research. He brings to this book over 25 years' experience in field research in the sociology of language and language development. He has conducted sociolinguistic surveys in more than 35 languages in Asia and the Americas and served as consultant on surveys in Africa, Australia, Europe, and the Pacific. Ken is particularly interested in the role of language research in strategic language development.

His more recent survey work in Papua New Guinea has given him a perspective supplementary to Decker's on sociolinguistic fieldwork and language development.
