

Society and Sociology: Britain in 2025

Editor's Introduction – David Mason

The papers in this issue were all specially commissioned to mark the turn of the century. Contributors, well-known for their work in particular specialisms, were asked to engage in informed speculation about developments in those aspects of British society which fell within their areas of expertise. They were further encouraged to reflect on what the implications of those developments might be for the discipline of sociology. The topics covered represent those where the editors were successful in persuading colleagues to rise to this challenging brief. They also reflect an editorial decision not to marginalise ethnicity and gender by commissioning separate papers in these areas but instead to encourage all authors to take account of these issues in their reflections. We believe the final result is a stimulating and entertaining collection. The authors have risen to the daunting task of thinking themselves forward a quarter of a century. They have also succeeded in combining careful scholarship with the more risky task of futurology. We hope that, like us, our readers will find their arguments both provocative and timely.

A criticism persistently levelled at social science in general, and sociology in particular, is that it is unable to make predictions. Whatever the truth of this claim, and there is not space here to review the various arguments, it is undoubtedly true that sociologists themselves have characteristically eschewed the role of soothsayers, although there are a number of celebrated exceptions to this general pattern. Whether for reasons of expediency (a fear of being exposed as wrong) or principle, there has been a tendency for the discipline to focus its efforts on *post hoc* empirical or theoretical analysis. In this context, we may note that many of those initially approached felt unable to assay the task of speculation while, even among those who accepted, there remained some unease about assuming the role, as one contributor put it, of Mystic Meg. In the light of this, it is interesting to note that there is a remarkable degree of convergence in the analyses offered by authors who have approached different topics from divergent theoretical and methodological starting points. Space constraints do not permit this introduction to attempt a detailed comparative analysis or overview, but there are some striking points of similarity between the overall perspectives of some papers even where detailed conclusions to some extent vary. It may be helpful to identify a few of these.

First, there is a more or less implicit view, in all the contributions, that the analysis of present and past patterns is a necessary starting point for informed
