Biography of a Blunder Dileep Edara, 2016-02-29 Engaging with a critical analysis of the base and superstructure thesis regarding which a surprising number of reputed Marxist thinkers betray a perpetual ambivalence by frequently deploying it in a variety of contexts but simultaneously airing various reservations about it this book proposes a radical departure from the presently predominant understanding of it The popular view of the base as comprising economics and superstructure as encompassing almost all other spheres of social life is criticised as panoramic or panoptic or the extended version to which Marx's rigorously defined base of production relations and superstructure of politico legal spheres is juxtaposed Revisiting Marx's formulations in his famous 1859 Preface described here as his purloined letters the study rehabilitates his restricted version and upholds its conceptual superiority over its extended avatar that is currently ubiquitous The substitution of Marx's restricted version with the widely believed extended version of the thesis is characterised here as a blunder and this book traces the biography of this blunder through the intricate and tortuous theoretical developments that traverse a transnational and multidisciplinary territory constituting the history of Marxism The last chapter argues for a paradigm shift in favour of the mode of production thesis in order to redeem the holistic vision of Marx This shift is necessitated by the extenuation of the status of the base and superstructure thesis that results from the restoration of Marx's restricted version This chapter grapples with the issues involved in preparing the ground for that shift It also contends that although these theoretical shifts are never formulated in a conscious and conclusive manner as is done here the best practices in Marxist analyses are always inspired by the methodological implications of the mode of production thesis and for this reason the thesis is claimed to be the conceptual unconscious of Marxism

About Canada: Health and Illness, 2nd ed. Dennis Raphael, 2017-01-13T00:00:00Z Most Canadians believe that their experiences of health and illness are shaped by genetics medical care and lifestyle choices Governments the media and disease associations reinforce this perception by pointing to medical research and a healthy lifestyle as the keys to health About Canada Health and Illness tells a different story In this new updated edition Dennis Raphael shows that living and working conditions income employment and quality of education as well as access to food housing and social services the social determinants of health are what dictate the health of Canadians And these social determinants are shaped by the public policy decisions of Canadian governments Whether you stay healthy or become ill has more to do with policies laws and regulations than genetics or lifestyle Over the past thirty years policymakers operating under the influence of neoliberalism have threatened health by allowing the growth of corporate power which has led to growing inequality in these social determinants of health This book is a wake up call to Canadians Public pressure needs to be put on elected representatives to create policies that are in the interest of the majority of Canadians not just the wealthy

It is for teachers, principals, superintendents, school leaders and policymakers. For too long many children have not achieved their best potential in mathematics at both primary and secondary schools. Although scholarly interest in students' attitudes towards mathematics and achievement in mathematics has increased, there is scant research which explores the explanatory potential of Bourdieu's trilogy of habitus, cultural capital and social field in investigating students' attitudes towards mathematics. The content is based on a rich empirical study of 1106 students aged 14-16 and gives a detailed account drawing on both quantitative and qualitative data to show the intersection of social class, gender and ethnicity on students' aspiration, attitudes towards mathematics and mathematical achievement at GCSE in secondary schools in England. *Introduction to the Social Sciences (RLE Social Theory)* Maurice Duverger, 2020-09-10 Professor Duverger at last provides the student with an overall view of the methodology of the social sciences. He briefly traces the origin of the notion of a social science, showing how it emerged from social philosophy. Its essential elements and pre-conditions are described. The splintering of social science into specialist disciplines is explained and the need for a general sociology confirmed. The techniques of observation used by social scientists are dealt with in some detail and the unity of the social sciences is illustrated by examples of the universal application of these techniques. Documentary evidence in its various forms are described along with the basic analytical techniques including quantitative methods and content analysis. Other methods of gathering information through polls, interviews, attitude scales and participant observation are all described. Professor Duverger brings together the different kinds of analysis used to assess the information thus gathered. Arguing that observing and theorizing are not two different stages or levels of research, he examines the practical value and difficulties of general sociological theories, partial theories and models and working

hypotheses He both describes and assesses the limitations of experiment and the scope of comparative methods in the social sciences He then gives elementary instructions for using and assessing the value of mathematical techniques The possibilities of presenting social phenomena through graphs and charts are also explored There are useful book lists and diagrams The Routledge Companion to Creativities in Music Education Clint Randles, Pamela Burnard, 2022-12-30
