Abstract: The Trans Sumatra Toll Road (TSTR) is a mega toll road project with an assignment State-Owned Enterprise (SOE) scheme in Indonesia. In its development, TSTR has several limitations, including funding, low investment feasibility and the un-optimum implementation of land value capture (LVC). This has the impact of delaying the completion of project development, decreasing the performance of toll road developer companies and even causing bankruptcy. LVC is an alternative funding scheme proven successful in other countries such as Hongkong, England and Vietnam. Several transportation projects based on transit-oriented development have successfully achieved profits using the LVC method. With a low project feasibility, the implementation of the Road Plus Property Developer (RPPD) business model is expected to be a solution to improve investment performance in the TSTR project. RPPD is defined as an assignment scheme toll road business model based on LVC implementation. This research aims to develop policies for implementing the RPPD business model on toll road SOE-assigned schemes. The data was collected by in-depth interviews with experts in two stages. The data analysis method used is Soft System Methodology (SSM). This research produces two recommended actions: ratification of the Presidential Regulation regarding the implementation of LVC and institutional transformation of regionally owned business entities in the property sector. It is hoped that implementing the RPPD policy will become a priority in completing the TSTR project.

1. Introduction

The development of toll road infrastructure continues to be a priority for the Indonesian government in producing extensive transportation infrastructure that will boost productivity and facilitate traffic or connectivity between regions. One of the priorities in the Long and Medium Term Plan (RJPMN) 2020–2024 is the construction of the Trans Sumatra Toll Road (TSTR). This is included in the list of national strategic priority projects connecting Sumatra Island, stretching from Bakaubeni to Banda Aceh via a 24-toll road section with a total length of 2813 km (Hutama Karya, 2019). PT Hutama Karya (Hutama Karya) is a State-Owned Enterprise, which received an assignment from the government to build and operate TSTR based on Presidential Decree No. 100 of 2014 and Presidential Decree No. 115 of 2015 concerning Amendments to Presidential Regulation No. 100 of 2014 concerning Acceleration of Toll Road Development in Sumatra.

The implementation of the assignment scheme in toll road operations in Indonesia still faces several obstacles from the Business Entity side as the recipient of the mandate. There are at least three main problems or issues faced by the SOE, which

Spies and Saboteurs Joseph F. Jakub III, 1999-01-13

Spies and Saboteurs is the story of the origins of the Anglo American Special Relationship in human intelligence collection and special operations which took place amidst the global conflagration that was the Second World War It is the story of William Wild Bill Donovan the father of America s Central Intelligence Agency and of his relationship with legendary British spymasters like William Stephenson code named Intrepid Stewart Menzies C chief of the Secret Intelligence Service Admiral John Godfrey the powerful and enigmatic director of Naval Intelligence and General Colin Gubbins Britain s master saboteur Relying almost exclusively upon recently declassified OSS and British intelligence documents and survivor interviews it examines the transatlantic association in espionage and sabotage guerrilla warfare and disinformation It explores the evolution of covert relations from a tutorial arrangement with the U S as pupil to an unequal then full partnership and ultimately to competition and rivalry in the prosecution of the clandestine war

Through Hitler's Back Door Alan Ogden, 2010-06-19

Romania Bulgaria Hungary and Slovakia were all German allies in the Second World War unlike the other countries of Europe which had either been forcibly occupied by the Nazis or remained neutral SOE Missions mounted within their borders were thus doubly hazardous for they were conducted in enemy populated territory heavily policed by military forces and gendarmerie Furthermore all these states had well developed and experienced security services usually supplemented by Gestapo and Abwehr units A further complication to the activities of SOE in these countries was that they had all been effectively conceded by Western Allies to Russia not surprisingly therefore operations in the Soviet sphere of influence were to prove diabolically difficult This is a story about the courage of individuals in the face of overwhelming odds Hunger ill health exhaustion cold and treachery all combined to make life for those members of SOE who parachuted into these Fascist outposts of Fortress Europe as insufferable as it was dangerous For weeks on end the SOE missions moved continually at night chased by enemy troops betrayed by local villagers awaiting air drops that never came and listening out for orders that were rarely specific Thus the picture that emerges of SOE activities in these countries is one of heroic proportions with courage dedication and daring displayed by every mission Although nearly all SOE personnel were either killed or captured the impact of their clandestine operations served as a persistent irritant continuously undermining Germanys strategic and political assumptions about the loyalty of her allies
