Danny Harvey, 2012-08-21 Winner of Choice Magazine Outstanding Academic Titles for 2007 Buildings account for over one third of global energy use and associated greenhouse gas emissions worldwide Reducing energy use by buildings is therefore an essential part of any strategy to reduce greenhouse gas emissions and thereby lessen the likelihood of potentially catastrophic climate change Bringing together a wealth of hard to obtain information on energy use and energy efficiency in buildings at a level which can be easily digested and applied Danny Harvey offers a comprehensive objective and critical sourcebook on low energy buildings Topics covered include thermal envelopes heating cooling heat pumps HVAC systems hot water lighting solar energy appliances and office equipment embodied energy buildings as systems and community integrated energy systems cogeneration district heating and district cooling The book includes exemplary buildings and techniques from North America Europe and Asia and combines a broad holistic perspective with technical detail in an accessible and insightful manner      [Index of Conference Proceedings](#) British Library. Document Supply Centre, 2001      **Integration of Alternative Sources of Energy** Felix A. Farret, M. Godoy Simoes, 2006-04-20 A unique electrical engineering approach to alternative sources of energy Unlike other books that deal with alternative sources of energy from a mechanical point of view Integration of Alternative Sources of Energy takes an electrical engineering perspective Moreover the authors examine the full spectrum of alternative and renewable energy with the goal of developing viable methods of integrating energy sources and storage efficiently Readers become thoroughly conversant with the principles possibilities and limits of alternative and renewable energy The book begins with a general introduction and then reviews principles of thermodynamics Next the authors explore both common and up and coming alternative energy sources including hydro wind solar photovoltaic thermosolar fuel cells and biomass Following that are discussions of microturbines and induction generators as well as a special chapter dedicated to energy storage systems After setting forth the fundamentals the authors focus on how to integrate the various energy sources for electrical power production Discussions related to system operation maintenance and management as well as standards for interconnection are also set forth Throughout the book diagrams are provided to demonstrate the electrical operation of all the systems that are presented In addition extensive use of examples helps readers better grasp how integration of alternative energy sources can be accomplished The final chapter gives readers the opportunity to learn about the HOMER Micropower Optimization Model This computer model developed by the National Renewable Energy Laboratory NREL assists in the design of micropower systems and facilitates comparisons of power generation techniques Readers can download the software from

theNREL Web site This book is a must read for engineers consultants regulators and environmentalists involved in energy production and delivery helping them evaluate alternative energy sources and integrate them into an efficient energy delivery system It is also a superior textbook for upper level undergraduates and graduate students **Advances in Cryogenic Engineering**

K. Timmerhaus, 2013-11-21 The year 1973 marked the first time that Atlanta one of the cultural centers of the South has hosted the Cryogenic Engineering Conference since its beginning in 1954 The Cryogenic Engineering Conference gratefully acknowledges the hospitality of the Georgia Institute of Technology and the assistance of W T Ziegler and his staff in making the visit to Atlanta a pleasant and memorable one Several significant changes were initiated at the 1973 Cryogenic Engineering Conference These included a Conference theme on the subject of Energy and the Environment a new Conference format and the beginning of a new Conference frequency of biennial meetings While retaining the traditional topics of previous meetings the 1973 Cryogenic Engineering Conference focused on the role of cryogenic engineering in the generation distribution and conversion of energy and the related environmental effects In these areas much of the current interest stems from the environmental effects of LNG and liquid hydrogen as compared with other competing energy forms These rapidly expanding areas may provide the impetus to cryogenic engineering in the 1970 s that the space program provided in the 1960 s The Conference format was altered by the use of numerous invited papers highlighting the theme These presentations were concentrated in plenary sessions initiating each day's activities and in seminars designed to summarize the various aspects of the theme **Directory of Published Proceedings**, 2002 **Integration of Renewable Sources of Energy**
