A Casual Revolution Jesper Juul,2012-02-10 How casual games like Guitar Hero Bejeweled and those for Nintendo Wii are expanding the audience for video games We used to think that video games were mostly for young men but with the success of the Nintendo Wii and the proliferation of games in browsers cell phone games and social games video games changed fundamentally in the years from 2000 to 2010 These new casual games are now played by men and women young and old Players need not possess an intimate knowledge of video game history or devote weeks or months to play At the same time many players of casual games show a dedication and skill that is anything but casual In A Casual Revolution Jesper Juul describes this as a reinvention of video games and of our image of video game players and explores what this tells us about the players the games and their interaction With this reinvention of video games the game industry reconnects with a general audience Many of today s casual game players once enjoyed Pac Man Tetris and other early games only to drop out when video games became more time consuming and complex Juul shows that it is only by understanding what a game requires of players what players bring to a game how the game industry works and how video games have developed historically that we can understand what makes video games fun and why we choose to play or not to play them Important Notice The digital edition of this book is missing some of the images found in the physical edition
