Surrounding Self-Control Alfred R. Mele,2020-06-01 Self control has gained enormous attention in recent years both in philosophy and the mind sciences for it has profound implications on so many aspects of human life Overcoming temptation improving cognitive functioning making life altering decisions and numerous other challenges all depend upon self control But recent developments in the philosophy of mind and in action theory as well as in psychology are now testing some of the assumptions about the nature of self control previously held on purely a priori grounds New essays in this volume offer fresh insights from a variety of angles neuroscience social cognitive and developmental psychology decision theory and philosophy While much of the literature on self control is spread across distinct disciplines and journals this volume presents for the first time a thorough and truly interdisciplinary exploration of the topic The essays address four central topics what self control is and how it works temptation and goal pursuit self control morality and law and extending self control They take up an array of complex and important questions What is self control How is self control related to willpower How does inhibitory control work What are the cultural and developmental origins of beliefs about self control How are attempts at self control hindered or helped by emotions How do our beliefs about our own ability to deal with temptation influence our behavior What does the ability to avoid temptation depend on How should juvenile responsibility be understood and how should the juvenile justice system be reformed Can an account of self control help us understand free will Combining the most recent scientific research with new frontiers in the philosophy of mind this volume offers the most definitive guide to self control to date

**The Risk of Regional Governance** Thomas Skuzinski,2017-09-18 Creating metropolitan regions that are more efficient equitable and sustainable depends on the willingness of local officials to work together across municipal boundaries to solve large scale problems How do these local officials think Why do they only sometimes cooperate What kind of governance do they choose in the face of persistent problems The Risk of Regional Governance offers a new perspective on these questions Drawing on theory from sociology and anthropology it argues that many of the most important cooperative decisions local officials make those about land use planning and regulation are driven by heuristic biased reasoning driven by cultural values The Risk of Regional Governance builds a sociocultural collective action framework and supports it with rich survey and interview data from hundreds of local elected officials serving in the suburbs of Detroit and Grand Rapids Michigan It is a story of the Rust Belt of how local officials think about their community and the region and most importantly of how we might craft policies that can overcome biases against regional governance

**The State and Industry in South Korea** Jong-Chan Rhee,2002-01-31 The economic success of East Asia is often attributed to the relationship between state and business In The State and Industry in South Korea Jong Chan Rhee presents a more balanced view of Korea s industrial miracle The book examines the limits of a strong

authoritarian state as a vehicle for intervening in the market or for sponsoring liberal reform In so doing the author focuses on how state controlled industrial adjustment in Korea has succeeded and failed *Culture Matters* Richard J

Ellis,2018-02-12 *Culture Matters* explores the role of political culture studies as one of the major investigative fields in contemporary political science Cultural theory was the focal point of the late Aaron Wildavsky s teaching and research for the last decade of his life a life that profoundly affected many fields of political science from the study of the presidency to public budgeting In this volume original essays prepared in Wildavsky s honor examine the areas of rational choice institutions theories of change political risk the environment and practical politics **Schelling's Game Theory** Robert

Dodge,2012-02-07 Thomas Schelling who wrote the foreword for this book won the Nobel Prize in economics for having enhanced our understanding of conflict and cooperation through game theory analysis This came after he had taught a course in game theory and rational choice to advanced students and government officials for 45 years In this book Robert Dodge provides in language for a broad audience the concepts that Schelling taught Armed with Schelling s understanding of game theory methods and his approaches to problems the general reader can improve daily decision making Mathematics often make game theory challenging but was not a major part of Schelling s course and is even less of a factor in this book Along with a summary of the material Schelling presented included are problems from the course and similar less challenging questions While considerable analysis is done with the basic game theory tool the two by two matrix much of the book is descriptive and rational decision making is explained with stories Chapter supplements are added to illuminate points presented by Schelling including writings by Paul Krugman Thomas Friedman Steven Levitt and others *Trapped in*

*Poverty?* James Davidson,Bill Jordan,Helen Kay,Marcus Redley,2013-09-27 How do people on low incomes make decisions about employment and benefit claims Interview material and economic analysis combine with new theories of the relationship between moral and economic reasoning **Handbook of Innovations in Political Psychology** Ethan C.

Busby,Christopher F. Karpowitz,Cara J. Wong,2025-03-12 In this interdisciplinary Handbook editors Ethan C Busby Christopher F Karpowitz and Cara J Wong explore not just what political psychology is but what it could be In so doing they and the chapter authors examine and expand political psychology s scope and relevance Bringing together a diverse array of authors to examine both core topics and emerging themes they combine foundational insights with fresh perspectives to consider what innovations exist and are needed in the field of political psychology *The Politics of Language* David

Beaver,Jason Stanley,2025-10-28 In much of the theory of meaning philosophers and linguists have focused on the use of language in conveying information in cooperative informational exchanges As a result political uses of speech of the sort that political propaganda exemplifies have not been taken to be a central case of language use In this book Jason Stanley and David Beaver focus on the political use of speech as a central case which leads to a foundational rethinking of the theory of meaning By focusing on the political uses of speech one arrives at better and more general tools to describe speech as well

as a more accurate view of its central functions More dramatically it enables us to see the ways in which virtually all speech is political a fact that is masked by much of the theory of meaning Stanley and Beaver s topic is speech generally its function and how best to represent that function Political propaganda serves as a window into that topic since its function is not obviously to share information or even misinformation They emphasize the importance of understanding how political propaganda works via the topic of the justification of free speech and argue that political propaganda poses a problem for a broad range of justifications of free speech Stanley and Beaver argue that it is not possible to compartmentalize the political aspects of speech from the non political aspects of speech nor is it possible to carve out a neutral deliberative space of evaluating reasons qua reasons Speech is invariably political

Children's Rights Law in the Global Human Rights Landscape Eva Brems, Ellen Desmet, Wouter Vandenhoele,2017-04-21 Children s rights law is often studied and perceived in isolation from the broader field of human rights law This volume explores the inter relationship between children s rights law and more general human rights law in order to see whether elements from each could successfully inform the other Children s rights law has a number of distinctive characteristics such as the emphasis on the best interests of the child the use of general principles and the inclusion of third parties e g parents and other care takers in treaty provisions The first part of this book questions whether these features could be a source of inspiration for general human rights law In part two the reverse question is asked could children s rights law draw inspiration from developments in other branches of human rights law that focus on other specific categories of rights holders such as women persons with disabilities indigenous peoples or older persons Finally the interaction between children s rights law and human rights law and the potential for their isolation inspiration or integration may be coloured or determined by the thematic issue under consideration Therefore the third part of the book studies the interplay between children s rights law and human rights law in the context of specific topics intra family relations LGBTQI marginalization migration media the environment and transnational human rights obligations

of all kinds have fallen into some of the most fundamental of traps when it comes to consumer marketing in assuming that the motivation that drives their customers is entirely rational Enrico Trevisan s The Irrational Consumer builds on the ground breaking works on behavioural economics of authors such as Daniel Kahneman and Richard Thaler in order to explain the fundamental drivers of customer decisions and how to incorporate these into your business strategy Learn how consumers respond to different offer architectures and discounts why they sometimes struggle to see the wood for the trees in a world of ever increasing options what are the rules of thumb they develop for making sense of value Behavioural economics offers organizations perspectives for engaging with customers whose views on what to buy are strongly driven by contextual factors such as the framework and the dynamics of choices Enrico Trevisan s The Irrational Consumer is your must have primer to this world
