The Karl Marx Library Karl Marx, 1972 **A People's History of Science** Clifford D. Conner, 2009-04-24 We all know the history of science that we learned from grade school textbooks How Galileo used his telescope to show that the earth was not the center of the universe how Newton divined gravity from the falling apple how Einstein unlocked the mysteries of time and space with a simple equation This history is made up of long periods of ignorance and confusion punctuated once an age by a brilliant thinker who puts it all together These few tower over the ordinary mass of people and in the traditional account it is to them that we owe science in its entirety This belief is wrong A People's History of Science shows how ordinary people participate in creating science and have done so throughout history It documents how the development of science has affected ordinary people and how ordinary people perceived that development It would be wrong to claim that the formulation of quantum theory or the structure of DNA can be credited directly to artisans or peasants but if modern science is likened to a skyscraper then those twentieth century triumphs are the sophisticated filigrees at its pinnacle that are supported by the massive foundation created by the rest of us Simón Bolívar David Bushnell, Lester D.

Langley, 2008-04-07 In this volume of essays on the life and legacy of Simón Bolívar a distinguished group of historians takes a fresh look at the impact of the Liberator as warrior political thinker and leader internationalist continentalist reformer and revolutionary A balanced yet critical Bread and Circuses Patrick Brantlinger, 2016-11-01 Lively and well written Bread and Circuses analyzes theories that have treated mass culture as either a symptom or a cause of social decadence Discussing many of the most influential and representative theories of mass culture it ranges widely from Greek and Roman origins through Marx Nietzsche Freud Ortega y Gasset T. S. Eliot and the theorists of the Frankfurt Institute down to Marshall McLuhan and Daniel Bell Brantlinger considers the many versions of negative classicism and shows how the belief in the historical inevitability of social decay a belief today perpetuated by the mass media themselves has become the dominant view of mass culture in our time While not defending mass culture in its present form Brantlinger argues that the view of culture implicit in negative classicism obscures the question of how the media can best be used to help achieve freedom and enlightenment on a truly democratic basis **Karl Marx and Friedrich Engels (RLE Marxism)** Cecil L.
