Stendhal Ecrivains De Toujours:

The Rise of the French Novel Martin Turnell, 1978 Martin Turnell's The Rise of the French Novel is a successor to his highly praised earlier books The Novel in France 1951 and The Art of French Fiction 1959 His aim now however is somewhat different as can be seen from the title It is well known that the reputations of many writers novelists especially diminish for a period following their deaths Although in the eighteenth century Marivaux Crillon and Rousseau all enjoyed a great deal of popularity during their lifetimes it is only recently that they have been subject to truly searching studies Yet they remain little read in English speaking countries Turnell emphasizes that in spite of the hostility of French critics and the fact that the novel did not reach its supremacy even in France until the nineteenth century the beginning of its great rise was indeed with such writers as these Their strong influence led such nineteenth century novelists as Stendhal and Flaubert to all kinds of changes related to style the enormous increase in the range of subject matter and the marked development of language Flaubert is the most striking example It was pointed out some time ago by Eisenstein that *Madame Bovary* anticipates cinematic technique One of Turnell's most interesting chapters explores the connections between the novel and film in general and *Madame Bovary* in particular In our own time two of the most popular French novelists in both the United States and England are Alain Fournier and Radiguet They are given enthusiastic appreciations in Turnell's thoughtful book

Day, 1987 Stendhal's narrators explicitly put forth an ethos of realism yet their self conscious voice calls attention to artifice in fictional texts that readily depict their own elaboration This study examines the integration of various patterns of self consciousness into works whose textual realism encourages readings that respect the novels as both textual construct and referential illusion In reflecting their own structures en abyme through various embedded narratives in thematizing the heroes and the narrators self consciousness in exalting literariness through patterns of novelistic and theatrical imitation Stendhal's novels problematize fictional narrative discourse and language itself while affirming their referential appeal to the reader's
