Italian centers of production and Florence in particular Instead this book explores the dynamic interchange between
European artistic centers and artists and the trade in works of art It also considers the impact of differing locations on art
and artists and some of the economic political and cultural factors crucial to the emergence of an artistic center During c
1420 1520 no city or court could succeed in isolation and so artists operated within a network of interests and local and
international identities The case studies presented in this book portray the Renaissance as an exciting international
phenomenon with cities and courts inextricably bound together in a web of economic and political interests **Annual**

Pooke, 2012-11-12 The last few decades have been among the most dynamic within recent British cultural history Artists
