curriculum and determines their ability to progress. Reflections on assessments during Covid 19 abounded with the challenges that both academics and students faced regarding online assessments including cheating and quality assurance issues. The focus on quality extended to the quality of teaching and learning in general. Moreover, the pandemic brought about the question of staff and student health and psychosocial support also became important. For academics, the abrupt shift to adapt to working from home and implementing online learning has led to overwork, low work-life balance, and compromised mental health. With a view on constructive and futuristic discourse, the sub-themes of the 2022 Focus conference encapsulate the current realities in the higher education sector and beyond. It further provides opportunities for an in-depth analysis based on the benefit of hindsight and foresight. The Organising Committee specifically coined the theme 'Re-inventing higher education: Insights, trends, and lessons learnt' for the conference to reflect on and address the matters mentioned earlier. Academics, scholars, and practitioners in the higher education sector are called upon to share their research and express their perspectives on the reinvention of higher education.
